

Physicochemical and elemental analyses of sandstone quarrying wastes to assess their impact on soil properties

Are there environmental or agricultural benefits in using forest residue biochar in boreal agricultural clay soil?

CFD modeling the diffusional losses of nanocluster-sized particles and condensing vapors in 90° bends of circular tubes

Effect of tungsten and selenium on C₁ gas bioconversion by an enriched anaerobic sludge and microbial community analysis

Structural Compatibility of Infrastructures Utilizing Alternative Earth Construction Materials

MicroEnv

A microsimulation model for quantifying the impacts of environmental policies on population health and health inequalities

Power production and microbial community composition in thermophilic acetate-fed up-flow and flow-through microbial fuel cells

Anaerobic treatment of LCFA-containing synthetic dairy wastewater at 20°C
Process performance and microbial community dynamics

Effects of elevated pressures on the activity of acidophilic bioleaching microorganisms

Application of an indoor air pollution metamodel to a spatially-distributed housing stock

Effects of energy retrofits on Indoor Air Quality in multifamily buildings

Semi-continuous mono-digestion of OFMSW and Co-digestion of OFMSW with beech sawdust
Assessment of the maximum operational total solid content

Why social sustainability counts

The impact of corporate social sustainability culture on financial success

Bio-hydrogen Production from Sewage Sludge

Screening for Pretreatments and Semi-continuous Reactor Operation

High-solids anaerobic digestion requires a trade-off between total solids, inoculum-to-substrate ratio and ammonia inhibition

Editorial

Biological treatment of selenium-laden wastewater containing nitrate and sulfate in an upflow anaerobic sludge bed reactor at pH 5.0

Temperature control as key factor for optimal biohydrogen production from thermomechanical pulping wastewater

Performance of a biotrickling filter for the anaerobic utilization of gas-phase methanol coupled to thiosulphate reduction and resource recovery through volatile fatty acids production

Radon, fungal spores and MVOCs reduction in crawl space house
A case study and crawl space development by hygrothermal modelling

Effects of wastewater constituents and operational conditions on the composition and dynamics of anodic microbial communities in bioelectrochemical systems

Nutrient management via struvite precipitation and recovery from various agroindustrial wastewaters
Process feasibility and struvite quality

Assessing urban population vulnerability and environmental risks across an urban area during heatwaves – Implications for health protection

Effects of different nickel species on autotrophic denitrification driven by thiosulfate in batch tests and a fluidized-bed reactor

Biological removal of selenate and ammonium by activated sludge in a sequencing batch reactor

Cultivation of *Scenedesmus acuminatus* in different liquid digestates from anaerobic digestion of pulp and paper industry biosludge

Fate of metallic engineered nanomaterials in constructed wetlands
prospection and future research perspectives

Indoor thermal environment, air exchange rates, and carbon dioxide concentrations before and after energy retro fits in Finnish and Lithuanian multi-family buildings

The effect of low-temperature pretreatment on the solubilization and biomethane potential of microalgae biomass grown in synthetic and wastewater media

Magnesium aminoclay enhances lipid production of mixotrophic *Chlorella* sp. KR-1 while reducing bacterial populations

Mild pressure induces rapid accumulation of neutral lipid (triacylglycerol) in *Chlorella* spp.

Performance of a sonic jet-type charger in high dust load

Sustainable nutrients recovery and recycling by optimizing the chemical addition sequence for struvite precipitation from raw swine slurries

Mitigation of propylene glycol emissions to groundwater and soil

Long-term stability of bioelectricity generation coupled with tetrathionate disproportionation

Recent advances in nutrient removal and recovery in biological and bioelectrochemical systems

Methodological approaches for fractionation and speciation to estimate trace element bioavailability in engineered anaerobic digestion ecosystems
