

Abstract: High-resolution live cell imaging during mechanical vibration loading

Abstract: Vibration stimulator for imaging mechanotransduction based cell responses

Abstract: Vibration stimulator for microscopically fast cell responses

A guide for medical information searches of bibliographic databases - psychiatric research as an example

Association of exercise loading history with fall-induced hip fracture risk.

Biomaterials for Electronics

Cerebellar Purkinje cells control eye movements with a rapid rate code that is invariant to spike irregularity

Comparison of injury severity between moped and motorcycle crashes  
A Finnish two-year prospective hospital-based study

Cost effective potentiostat design for large dynamic range measurements

Coverage of the bibliographic databases in mental health research

Disposable Microfluidic Sensor Based on Nanocellulose for Glucose Detection

Ecosystem approach on medical game development: The relevant actors, value propositions and innovation barriers

Effect of Implant Coating on Wireless Powering for Intracranial Pressure Monitoring System

EU\*US eHealth Works to Improve Global Workforce Development

Evaluation of printed P(VDF-TrFE) pressure sensor signal quality in arterial pulse wave measurement

Examining service experiences: comparing methods to capture children's experiences

Feature-based analysis of mouse prostatic intraepithelial neoplasia in histological tissue sections

Foundational eHealth Curricula for the health care workforce

Fully-automated quantitative estimation of volumetric breast density from digital breast tomosynthesis images

Glass and Glass-Ceramic Scaffolds: Manufacturing Methods and the Impact of Crystallization on In-Vitro Dissolution

Health figures: an open source JavaScript library for health data visualization

Identified opportunities for gamification in the elective primary fast-track total hip and knee arthroplasty journey  
Secondary analysis of healthcare professionals' interviews

Impact loading history modulates hip fracture load and location: A finite element simulation study of the proximal femur in female athletes

Impact of Variable RNA-Sequencing Depth on Gene Expression Signatures and Target Compound Robustness  
Case Study Examining Brain Tumor (Glioma) Disease Progression

Implementation and User Testing of a System for Visualizing Continuous Health Data and Events

Influence of exercise history on fall-induced hip fracture risk.
