

Adaptive sampling for compressed sensing based image compression

Anthropometric clothing measurements from 3D body scans

A Primal Neural Network for Online Equality-Constrained Quadratic Programming

Automated design of networks of transport-triggered architecture processors using dynamic dataflow programs

Automatic image-based detection and inspection of paper fibres for grasping

Automatic word count estimation from daylong child-centered recordings in various language environments using language-independent syllabification of speech

Bayesian receiver operating characteristic metric for linear classifiers

Benchmark database for fine-grained image classification of benthic macroinvertebrates

Calculation of the scalar diffraction field from curved surfaces by decomposing the three-dimensional field into a sum of Gaussian beams

Compressive sensed video recovery via iterative thresholding with random transforms

Convolutional low-resolution fine-grained classification

Deep Learning Case Study for Automatic Bird Identification

Detection of bubbles as concentric circular arrangements

Discriminant Bag of Words based representation for human action recognition

Distant speech separation using predicted time-frequency masks from spatial features

Dominant Rotated Local Binary Patterns (DRLBP) for texture classification

Dynamic action recognition based on dynemes and Extreme Learning Machine

Ensembles of dense and dense sampling descriptors for the HEP-2 cells classification problem

Foveated Nonlocal Self-Similarity

Gaussian mixture models for signal mapping and positioning

Generative part-based Gabor object detector

Image-based characterization of the pulp flows

Image database TID2013
Peculiarities, results and perspectives

Interaction strategies for an affective conversational agent

Is Texture Denoising Efficiency Predictable?

Kernel reference discriminant analysis

Model selection for linear classifiers using Bayesian error estimation

Multilinear class-specific discriminant analysis

Multimodal subspace support vector data description

Multi-sensor next-best-view planning as matroid-constrained submodular maximization

Multi-view action recognition based on action volumes, fuzzy distances and cluster discriminant analysis

Multi-view predictive latent space learning

Nyström-based approximate kernel subspace learning

On the kernel Extreme Learning Machine classifier

Paraxial light beams in structured anisotropic media

Performance analysis of single-query 6-DoF camera pose estimation in self-driving setups

Probabilistic approach to physical object disentangling

Probabilistic saliency estimation

Scalar diffraction field calculation from curved surfaces via Gaussian beam decomposition

Soft robotic gripper with compliant cell stacks for industrial part handling

Sparse approximations in complex domain based on BM3D modeling

Sparse extreme learning machine classifier exploiting intrinsic graphs

Subjective evaluation of Super Multi-View compressed contents on high-end light-field 3D displays

The MOBISERV-AIIA eating and drinking multi-view database for vision-based assisted living

Two-time coherence of pulse trains and the integrated degree of temporal coherence

Urban 3D segmentation and modelling from street view images and LiDAR point clouds

Big Media Data Analysis

Data-driven stream mining systems for computer vision

Modeling and estimation of signal-dependent and correlated noise

Social human-robot interaction in the wild
A workshop proposal for academic mindtrek 2020

360 panorama super-resolution using deep convolutional networks

A comparison of security assurance support of agile software development methods

Active classification for human action recognition

Adaptive spatial resolution selection for stereoscopic video compression with MV-HEVC
A frequency based approach

'Aie-studio' - A pragmatist aesthetic approach for procedural sound design

Analysis of accommodation cues in holographic stereograms

An efficient GPU implementation of an arbitrary resampling polyphase channelizer

An evaluation framework for cross-platform mobile app development tools
