

The effect of lake bottom sediment layers on radionuclide transport from bedrock to biosphere and doses to humans

Biomechanical performance of cranial implants with different thicknesses and material properties
A finite element study

Conformal mapping of the human scapula to generate dense landmark features

Tuberculosis transmission
Modelled impact of air-tightness in dwellings in the UK

Using probabilistic sampling-based sensitivity analyses for indoor air quality modelling

Statistical short-term network planning of distribution system and distributed generation

Condition monitoring of storage batteries in telecom power systems-crisp vs. soft computing methodology

Soft computing-based controller design for a telecom rectifier

Internet of Things and Sensor Networks

The Internet of Things and Sensor Networks

Guest Editorial Special Issue on Multimedia Big Data in Internet of Things

Preface
Special Issue on 'New Hydraulic Components for Tough Robots'

Guest editorial introduction to the focused section on design and control of hydraulic robots

Guest editorial special issue on the internet of nano things

Flow-bounded trajectory-scaling algorithm for hydraulic robotic manipulators

Serverless
What it Is, What to Do and What Not to Do

ICface
Interpretable and controllable face reenactment using GANs

Propagation dynamics of ultrabroadband terahertz beams with orbital angular momentum for wireless data transfer

A membrane external-cavity surface-emitting laser (MECSEL) with emission around 825 nm

Complex-domain sparse imaging in terahertz pulse time-domain holography with balance detection

73-fs SESAM mode-locked Tm,Ho:CNGG laser at 2061 nm

Continuous-wave optical parametric oscillators for mid-infrared spectroscopy

Cyclic quantum walks
Photonic realization and decoherence analysis

Patterns for serverless functions (Function-as-a-Service)
A multivocal literature review

Redundancy-based visual tool center point pose estimation for long-reach manipulators

Safety at chimney-roof penetration
A numerical investigation

Position Estimation for Drones based on Visual SLAM and IMU in GPS-denied Environment

Red Alert
Break-Glass Protocol to Access Encrypted Medical Records in the Cloud

Visibility-Aware Part Coding for Vehicle Viewing Angle Estimation

Portrait instance segmentation for mobile devices

MAST: Mask-accelerated shearlet transform for densely-sampled light field reconstruction

Modeling mmWave Channels in High-Fidelity Simulations of Unmanned Aerial Systems

KPI-ML based integration of industrial information systems

Hand gesture-based on-line programming of industrial robot manipulators

Acceptance and perceptions of interactive location-tracking displays

Face verification and recognition for digital forensics and information security

Linearization of BJTs with logarithmic predistortion

OFDM radar with LTE waveform
Processing and performance

Asterism
Decentralized file sharing application for mobile devices

Error analysis of NOMA-based user cooperation with SWIPT

Digging deeper into egocentric gaze prediction

How do academics experience use of recorded audio feedback in higher education? A thematic analysis

DGC-Net
Dense geometric correspondence network

Towards sustainable manufacturing by extending Manufacturing Execution System functions

Thin form-factor super multiview head-up display system

Additional lossless compression of JPEG images based on BPG

Phase masks optimization for broadband diffractive imaging

Combined no-reference IQA metric and its performance analysis

MECSELS with direct emission in the 760 nm to 810 nm spectral range
A single- and double-side pumping comparison and high-power continuous-wave operation

1.55- μm wavelength wafer-fused OP-VECSELS in flip-chip configuration

Code ABC hackathons
Teachers as tinkers

From monolithic systems to microservices
A decomposition framework based on process mining

405-nm pumped Ce^{3+} -doped silica fiber for broadband fluorescence from cyan to red

Observation of local electroluminescent cooling and identifying the remaining challenges

1.3 μm U-bend traveling wave SOA devices for high efficiency coupling to silicon photonics

Smartphone teleoperation for self-balancing telepresence robots

Revisiting gray pixel for statistical illumination estimation

Benchmarking of several disparity estimation algorithms for light field processing

Action and power efficiency in self-organization
The case for growth efficiency as a cellular objective in escherichia coli

Single exposure lensless subpixel phase imaging

Short-range supercontinuum based lidar for combustion diagnostics

Switchable unidirectional second-harmonic emission through GaAs nanoantennas

Tailoring directional scattering of second-harmonic generation from (111)-GaAs nanoantennas

Color Constancy Convolutional Autoencoder

On Confidences and Their Use in (Semi-)Automatic Multi-Image Taxa Identification

Hardware-in-the-loop platform for testing autonomous vehicle control algorithms

Kalman-Type Filters and Smoothers for Pedestrian Dead Reckoning

Olfactory display prototype for presenting and sensing authentic and synthetic odors

Real-time and Robust Collaborative Robot Motion Control with Microsoft Kinect ® v2

Inertial Sensor-Based State Estimation of Flexible Links Subject to Bending and Torsion

Role-based visualization of industrial IoT-based systems

Dimensional analysis conceptual modeling supporting adaptable reasoning in simulation-based training

Performance Evaluation of Coordinated Multipoint Transmission at 28 GHz Frequency Using 3D Ray Tracing

Ray-based evaluation of dual-polarized MIMO in (Ultra-)dense millimeter-wave urban deployments

A multi-purpose automated vehicular platform with multi-radio connectivity capabilities

Performance Analysis of Single Carrier Coherent and Noncoherent Modulation under I/Q Imbalance

Optical Asymmetric Modulation for VLC Systems - Invited Paper

Ergodic Capacity Analysis of Wireless Transmission over Generalized Multipath/Shadowing Channels

Modeling and cancellation of self-interference in full-duplex radio transceivers
Volterra series-based approach

Effects of blockage in deploying mmWave drone base stations for 5g networks and beyond

Optimizing wirelessly powered crowd sensing
Trading energy for data

Secure Firmware Updates for IoT
A Survey

Cybersecurity Attacks and Defences for Unmanned Smart Ships

Activation game for older adults - Development and initial user experiences

PIVO

Probabilistic inertial-visual odometry for occlusion-robust navigation

Photovoltaic plant cloud shadowing and energy drops in Northern Europe

Towards secure cloud orchestration for multi-cloud deployments

Detection of beat-to-beat intervals from wrist photoplethysmography in patients with sinus rhythm and atrial fibrillation after surgery

Exploiting suppliers' potential in construction innovations

Configuring and visualizing the data resources in a cloud-based data collection framework

A multi-agent approach for processing industrial enterprise data

An approach to production scheduling optimization a case of an oil lubrication and hydraulic systems manufacturer

Detailed Interference Analysis in Dense mmWave Systems Employing Dual-Polarized Antennas

Analyzing Effects of Directional Deafness on mmWave Channel Access in Unlicensed Bands

Image-Based Localization Using Hourglass Networks

Dual Structured Convolutional Neural Network with Feature Augmentation for Quantitative Characterization of Tissue Histology

Ultra-large mode area single frequency anisotropic MOPA with double clad Yb-doped tapered fiber

Multiwavelength surface contouring from phase-coded diffraction patterns

Elementary math to close the digital skills gap

Making the cloud work for software producers
Linking architecture, operating cost and revenue

Integrated multi-wavelength mid-IR light source for gas sensing

Highly-efficient Ho:KY(WO₄)₂ thin-disk lasers at 2.06 μm

Methods and tools for denoising of complex-valued images based on block-matching and high order singular value decomposition

Deep p-Fibonacci scattering networks

Blind estimation of white Gaussian noise variance in highly textured images

Robust linearized combined metrics of image visual quality

Combined local and global image enhancement algorithm

Compression of signs of DCT coefficients for additional lossless compression of JPEG images

Conversion of sparsely-captured light field into alias-free fullparallax multiview content

Knowledge-based artificial neural network (KB-ANN) in engineering

Associating functional architecture modeling, dimensional analysis and causal graphs to produce optimized topologies for KB-ANNs

Architectural patterns for microservices

A systematic mapping study

Action recognition using the 3D dense microblock difference

Predicting academic success based on learning material usage

Comparison of time metrics in programming

Novel D2D-based relaying method for multicast services over 3GPP LTE-A systems

Mobility aware eMBMS management in urban 5G-oriented systems

Optimal subgroup configuration for multicast services over 5G-satellite systems

Monitoring pH, temperature and humidity in long-term stem cell culture in CO₂ incubator

Using and collecting fine-grained usage data to improve online learning materials

Towards the Utilization of Crowdsourcing in Traffic Condition Reporting

Preventing keystroke based identification in open data sets

Towards a conceptual framework for privacy protection in the use of interactive 360° video surveillance

Viewport-adaptive encoding and streaming of 360-degree video for virtual reality applications

Standard-compliant multiview video coding and streaming for virtual reality applications

Efficient coding of 360-degree pseudo-cylindrical panoramic video for virtual reality applications

Color-distribution similarity by information theoretic divergence for color images

Dynamic laser speckle metrology with binarization of speckle patterns

Picosecond MOPA with ytterbium doped tapered double clad fiber

Internet of Things

Opportunities for vocational education and training: Presentation of the pilot project

Computational wavelength resolution for in-line lensless holography
Phase-coded diffraction patterns and wavefront group-sparsity

Dimension reduction and decomposition using causal graph and qualitative analysis for aircraft concept design optimization

Complex elevator system DSM-case for a DSM design sprint

Full-reference metrics multidistortional analysis

BM3D-HVS

Content-Adaptive denoising for improved visual quality

A dynamical quality model to continuously monitor software maintenance

Experimenting traditional and modern reliability models in a 3-years european software project

Describing mobile devices as RESTful services for the end-users

Dynamic social trust associations over d2d communications
An implementation perspective

Temporal dimensions of affect in user experience of digital news in the field

Software visualization today - Systematic literature review

Participatory development of user experience design guidelines for a B2B company

Focusing on user experience and business models in startups
Investigation of two-dimensional value creation

Casual immersive viewing with smartphones

A coordination-based brokerage architecture for multi-cloud resource markets

MVP Explained

A Systematic Mapping Study on the Definitions of Minimal Viable Product

Challenges and capabilities of conductive polymeric materials for electromechanical stimulation of stem cells
A case study

Trading exploits online
A preliminary case study

Asymmetric full-duplex with contiguous downlink carrier aggregation

Utilizing MOOCs in the development of education and training programs

Portable sensor system for reliable condition measurement

Multi-carrier CDMA for network assisted device-to-device communications for an integrated OFDMA cellular system

Novel frequency domain cyclic prefix autocorrelation based compressive spectrum sensing for cognitive radio

A novel stochastic channel modeling approach for mmWave systems with beamforming

Investigating mid-air gestures and handhelds in motion tracked environments

Towards semantic self-description of industrial devices and control system interfaces

Coordinating proactive social devices in a mobile cloud
Lessons learned and a way forward

Feasibility characterization of cryptographic primitives for constrained (wearable) IoT devices

Random Value Impulse Noise Removal Based on Most Similar Neighbors

Quantitative + qualitative information for heritage conservation
An open science research for paving 'collaboratively' the way to historical-BIM

Lean manufacturing methods in simulation literature
Review and association analysis

Integrating III-V, Si, and polymer waveguides for optical interconnects
RAPIDO

Fabrication and characterization of broadband superluminescent diodes for 2 μm wavelength

High-power 1550 nm tapered DBR lasers fabricated using soft UV-nanoimprint lithography

Methodology to obtain the security controls in multi-cloud applications

Optical fiber amplifier with spectral compression elements for high-power laser pulse generation

Dots-on-the-fly electron beam lithography

An image generator platform to improve cell tracking algorithms simulation of objects of various morphologies, kinetics and clustering

Simultaneous binary hash and features learning for image retrieval

Hot pen and laser writable photonic polymer films

HVS-based local analysis of denoising efficiency for DCT-based filters

Method of data compression for traffic monitoring

Bispectrum-based demodulation technique using triple-channel heterodyning of triplet-signal

Texture detection in noisy images by combining several local parameters

Urban sensing and smart home energy optimisations
A machine learning approach

Antroposeeni - A mixed reality game

OASIS deck of cards - House of colleagues
A playful

Evaluating a Future Remote Control Environment with an Experience-Driven Science Fiction Prototype

Image interpolation based on non-local geometric similarities

Gathering useful programming data; Analysis and insights from real-time collaborative editing

Wideband self-adaptive RF cancellation circuit for full-duplex radio
Operating principle and measurements

Prioritized centrally-controlled resource allocation in integrated multi-RAT HetNets

AvanTomography
A compact module for positron emission mammography

Collaborative cloud-based management of home networks

Blind estimation of speckle variance in synthetic aperture radar images

Experimental study of bispectrum-based encoding in radio communication system

Variable switching point predictive torque control with extended prediction horizon

Semantic Labeling of Places based on Phone Usage Features using Supervised Learning

Video summarization based on Subclass Support Vector Data Description

Employing a multi-Objective robust optimisation method for healthy and low-energy dwelling design in Delhi, India

2.4 GHz inkjet-printed RF energy harvester on bulk cardboard substrate

Power and wavelength scaling using semiconductor disk laser - bismuth fiber MOPA systems

Green (In,Ga,Al)P-GaP light-emitting diodes grown on high-index GaAs surfaces

Preserving natural scene lighting by strobe-lit video

Machine learning for adaptive bilateral filtering

A perceptual quality metric for high-definition stereoscopic 3D video

No-reference visual quality assessment for image inpainting

Real-time depth image-based rendering with layered dis-occlusion compensation and aliasing-free composition

A method for predicting DCT-based denoising efficiency for grayscale images corrupted by AWGN and additive spatially correlated noise

Depth map occlusion filling and scene reconstruction using modified exemplar-based inpainting

1180nm VECSEL with 50 W output power

Monolithic GaInNAsSb/GaAs VECSEL emitting at 1550 nm

>8W GaInNAs VECSEL emitting at 615 nm

Combining full-reference image visual quality metrics by neural network

Idea-space

A use case of collaborative course development in higher education

Roadmap for organic and printed electronics

Measuring bend losses in large-mode-area fibers

Multi-physics modeling and simulation of a frequency doubling antenna sensor for passive wireless strain sensing

DYNAMO sound engine - Exploring the aesthetics of dynamic sound interactions

Body-touching

An embodied interaction technique for health information systems in developing regions

Email intensity, productivity and control in the knowledge worker's performance on the desktop

Games and energy
Profiling power usage during play

MurMur Moderators, the talking playful seats

On computation of calcium cycling anomalies in cardiomyocytes data

RF tag front-end design for uncompromised communication and harvesting

Effect of feeder cable's phase tolerance on the first sidelobe level of base station antenna

Adaptive sampling for compressed sensing based image compression

Radar micro-Doppler feature extraction using the Singular Value Decomposition

Haptic user interface enhancement system for touchscreen based interaction
A novel system for multimodal interaction with touchscreen interfaces

Developing novel multimodal interaction techniques for touchscreen in-vehicle infotainment systems

The lord of the sense
A privacy preserving reputation system for participatory sensing applications

Pulsed high-power yellow-orange VECSEL

Graph based representation and analyses for conceptual stages

Optical and topographic changes in water-responsive patterned cholesteric liquid crystalline polymer coatings

A hand-held immaterial volumetric display

Avoiding anomalies when modeling a many-to-many relationship in a multidimensional database

Mode coupling in few-mode large-mode-area fibers

Building energy-efficiency interventions in North-East Europe
Effects on indoor environmental quality and public health

Crack propagation measurement using a battery-free slotted patch antenna sensor

Compressive strain measurement using RFID patch antenna sensors

An origami inspired reconfigurable spiral antenna

Characterization of charge in airborne fungal spores

Wearable and implantable antennas for wireless body-centric sensing systems

Variable switching point predictive torque control

View-independent human action recognition based on multi-view action images and discriminant learning

Person identification from actions based on dynamics and discriminant learning

Exploiting RSS measurements among neighbouring devices
A matter of trust

Towards an approach for evaluating the quality of requirements

Checking visual data flow programs with finite process models

Design and simulation of a slotted patch antenna sensor for wireless strain sensing

Chip-to-package wireless power transfer and its application to mm-Wave antennas and monolithic radiometric receivers

Virtualizing power cords by wireless power transmission and energy harvesting

Wireless chipless passive electromagnetic transducers for SHM applications

Multi-physics modeling and simulation of a slotted patch antenna for wireless strain sensing

Service-oriented approach to improve interoperability of e-learning systems

How do students solve parsons programming problems? - Execution-based vs. line-based feedback

A novel framework for design and implementation of adaptive stream mining systems

Face typing
Vision-based perceptual interface for hands-free text entry with a scrollable virtual keyboard

A system for real-time detection and tracking of vehicles from a single car-mounted camera

Wear and corrosion behaviour of HVOF coatings engineered from conventional WC-Co-Cr and conventional WC-Co-Cr added nanostructured Wc-Co powders

Wireless sensing and identification of passive electromagnetic sensors based on millimetre-wave FMCW RADAR

Thermal effects on a passive wireless antenna sensor for strain and crack sensing

Systematic integration of flowgraph- and module-level parallelism in implementation of DSP applications on multiprocessor systems-on-chip

Multiobjective TDMA optimization for neuron-based molecular communication

Distributed pervasive services using group service communication supporting body area networks

Visually lossless compression of synthetic aperture radar images

Performance evaluation of distributed NoTA applications on multi-core platforms

Influence factors for sharing open science and open educational resources through social networking services

SkyMedia - UAV-based capturing of HD/3D content with WSN augmentation for immersive media experiences

PETMEI 2011

The 1st international workshop on pervasive eye tracking and mobile eye-based interaction

Database-driven tool support for DisCo executable specifications

Multicolor nonlinear pulse compression by consecutive optical parametric amplification in quasi-phase matched structures

Thickness variation study of RFID-based folded patch antennas for strain sensing

A design tool for efficient mapping of multimedia applications onto heterogeneous platforms

On delay distribution in IEEE 802.11 wireless networks

Bio-inspired service management framework

Green data-centres case study

A probability-based approach to modeling the risk of unauthorized propagation of information in on-line social networks

A framework for building behavioral models for design-stage failure identification using dimensional analysis

Wrench feasible workspace analysis of cable-driven parallel manipulators using LMI approach

Mobile Journalist Toolkit

A field study on producing news articles with a mobile device

The magical world of metamaterials

Towards certifying the testing process of open-source software

New challenges or old methodologies?

Network classes and graph complexity measures

Towards a channel capacity of communication networks

Measurement theory and dimensional analysis
Methodological impact on the comparison and evaluation process

Global information processing in gene networks
Fault tolerance

Labyrinth based left-handed metamaterials and sub-wavelength focusing of electromagnetic waves

Classification of large graphs by a local tree decomposition

Framework for optimization and scheduling of a copper production plant

Two models for hydraulic cylinders in flexible multibody simulations

Towards dependable automation

A survey on control of hydraulic robotic manipulators with projection to future trends

Necessary and sufficient conditions for the existence of solution of generalized fuzzy relation equations $A \Leftrightarrow X = B$

Tree species classification using structural features derived from terrestrial laser scanning

Soft robotic gripper with compliant cell stacks for industrial part handling

Measurements of Mobile Blockchain Execution Impact on Smartphone Battery

On the zeros of the partial Hosoya polynomial of graphs

Wake-up Radio-Based 5G Mobile Access
Methods, Benefits, and Challenges

Characterizing Resource Allocation Trade-Offs in 5G NR Serving Multicast and Unicast Traffic

TinderMIX
Time-dose integrated modelling of toxicogenomics data

Utilizing Neurons for Digital Logic Circuits
A Molecular Communications Analysis

Anthropometric clothing measurements from 3D body scans

Data augmentation approaches for improving animal audio classification

Correlates of social media fatigue and academic performance decrement
A large cross-sectional study

Lage und Zukunft des wissenschaftlichen Nachwuchses
Eine Stellungnahme des Beirats des Wissenschaftlichen Nachwuchses (WiN) der Gesellschaft für Informatik (GI e.V.)

In-flight wind field identification and prediction of parafoil systems

Game-theoretic semantics for ATL⁺ with applications to model checking

Modified Wilkinson power divider with harmonics suppression and compact size for GSM applications

Who contributes what? Scrutinizing the activity data of 4.2 million Zhihu users via immersion scores

Social media overload, exhaustion, and use discontinuance
Examining the effects of information overload, system feature overload, and social overload

Microflow-Based Device for In Vitro and Ex Vivo Drug Permeability Studies
