

Assessment of PIV performance in validating CFD models from nasal cavity CBCT scans

Tidal breathing flow profiles during sleep in wheezing children measured by impedance pneumography

Vibration transmittance measures sternotomy stability - a preliminary study in human cadavers

Measuring ventilation and modelling M. Tuberculosis transmission in indoor congregate settings, rural KwaZulu-Natal

Tidal flow variability measured by impedance pneumography relates to childhood asthma risk

Assessment of respiratory effort during sleep with noninvasive techniques

Intrapleural photodynamic therapy for mesothelioma
What place and which future?

Disconnection between periodic leg movements and cortical arousals in spinal cord injury
