

A custom processor for protocol-independent packet parsing

Systematic integration of flowgraph- and module-level parallelism in implementation of DSP applications on multiprocessor systems-on-chip

A k-nearest neighbor multilabel ranking algorithm with application to content-based image retrieval

Still image/video frame lossy compression providing a desired visual quality

Deep Reinforcement Learning for Financial Trading Using Price Trailing

Real-time online drilling vibration analysis using data mining

Automated design of networks of transport-triggered architecture processors using dynamic dataflow programs

Multi-view predictive latent space learning

Hermitian normalized Laplacian matrix for directed networks

Looking for a five-legged sheep  
Identifying enterprise architects' skills and competencies

Majorization-minimization for manifold embedding

Optimization equivalence of divergences improves neighbor embedding

Peer to Peer Offloading with Delayed Feedback  
An Adversary Bandit Approach

Anthropometric clothing measurements from 3D body scans

Parameterized scheduling for signal processing systems using topological patterns

A model-based schedule representation for heterogeneous mapping of dataflow graphs

A design tool for high performance image processing on multicore platforms

Some background on dialogue management and conversational speech for dialogue systems

Low-latency Deep Clustering for Speech Separation

HTML5-based mobile agents for Web-of-Things

A Mixed Finite Element Method to Solve the EEG Forward Problem

Combined local and global image enhancement algorithm

On continuous deployment maturity in customer projects

Low latency edge rendering scheme for interactive 360 degree virtual reality gaming

Novel pairwise coupled kinematic solution for algebraic angular acceleration estimation of serial link manipulators

PaaSword

A holistic data privacy and security by design framework for cloud services

Emotional Reactions to Point-Light Display Animations

Guidelines for development and evaluation of usage data analytics tools for human-machine interactions with industrial manufacturing systems

Validating effectiveness of safety requirements' compliance evaluation in process assessments

Ripple thermostat

Affecting the emotional experience through interactive force feedback and shape change

Mixed-integer linear programming approach for global discrete sizing optimization of frame structures

On constructibility and unconstructibility of LTS operators from other LTS operators

A State Space Tool for Concurrent System Models Expressed In C++

Stop it, and be stubborn!

Fair testing and stubborn sets

Optimizing gaze direction in a visual navigation task

A convolutional neural network approach for acoustic scene classification

Feasibility of FPGA accelerated IPsec on cloud

Integrated controller for an over-constrained cable driven parallel manipulator  
KNTU CDRPM

Towards Efficient Code Generation for Exposed Datapath Architectures

Briefing news reporting with mobile assignments - Perceptions, needs and challenges

Software Startups - A Research Agenda

Multimodal and mobile conversational Health and Fitness Companions

Necessary and sufficient conditions for the existence of solution of generalized fuzzy relation equations  $A \Leftrightarrow X = B$

Using Deep Learning for price prediction by exploiting stationary limit order book features

Executing dataflow actors as kahn processes

Toward efficient many-core scheduling of partial expansion graphs

PyGOP

A Python library for Generalized Operational Perceptron algorithms

Lean manufacturing methods in simulation literature

Review and association analysis

Of discs, boxes and cartridges

The material life of digital games

Comparison of Feature Selection Techniques in Machine Learning for Anatomical Brain MRI in Dementia

Multilinear class-specific discriminant analysis

Learning movement synchronization in multi-component robotic systems

Comparing the Built-In Application Architecture Models in the Web Browser

Microservices in agile software development

A workshop-based study into issues, advantages, and disadvantages

Operationalizing the experience factory for effort estimation in agile processes

Comparing communication effort within the scrum, scrum with Kanban, XP, and Banana development processes

How developers perceive smells in source code

A replicated study

On the Definition of Microservice Bad Smells

Architectural patterns for microservices

A systematic mapping study

Patterns for serverless functions (Function-as-a-Service)

A multivocal literature review

Prediction models and techniques for Open Source Software projects

A systematic literature review

Preface  
Special Issue on 'New Hydraulic Components for Tough Robots'

Designing an Unobtrusive Analytics Framework for Monitoring Java Applications

Collecting usage data for software development  
Selection framework for technological approaches

Post-deployment data  
A recipe for satisfying knowledge needs in software development?

Detection of bubbles as concentric circular arrangements

The making of Nordic larp  
Documenting a tradition of ephemeral co-creative play

Narrative friction in Alternate Reality Games  
Design insights from conspiracy for good

Enhanced gaze interaction using simple head gestures

Comparison of gaze-to-objects mapping algorithms

Collaboration change in enterprise software development

Interaction strategies for an affective conversational agent

Investigation of egocentric social structures for diversity-enhancing followee recommendations

Liking the game  
How can spectating motivations influence social media usage at live esports events?

The Double Shadowed  $\kappa$ - $\mu$  Fading Model

Collaborative cloud-based management of home networks

Enabling cybersecurity incident reporting and coordinated handling for maritime sector

Challenges and recommended practices for software architecting in global software development

Software architecture design in global software development  
An empirical study

Dynamic text presentation in print interpreting - An eye movement study of reading behaviour

Reading on-screen text with gaze-based auto-scrolling

Body-touching

An embodied interaction technique for health information systems in developing regions

Farm detection based on deep convolutional neural nets and semi-supervised green texture detection using VIS-NIR satellite image

Silicon capillary gripper with self-alignment capability

Exploiting suppliers' potential in construction innovations

On Renyi's entropy estimation with one-dimensional Gaussian kernels

Analysis of an efficient parallel implementation of active-set Newton algorithm

Mixed reality with multimodal head-mounted pico projector

User generated soundscapes activating museum visitors

Modular audio story platform for museums

Games and energy

Profiling power usage during play

Electroplated nickel microspring and low-friction precision linear slider

A novel micro-force sensing tool

Conversion of sparsely-captured light field into alias-free fullparallax multiview content

Code notes

Designing a low-cost tangible coding tool for/with children

Scinet

Interactive intent modeling for information discovery

IntentRadar

Search user interface that anticipates user's search intents

Exploring the use of deprecated PHP releases in the wild internet

Still a LAMP issue?

Trading exploits online

A preliminary case study

Time series trends in software evolution

Exploring the Stability of Software with Time-Series Cross-Sectional Data

Software evolution and time series volatility

An empirical exploration

Is Texture Denoising Efficiency Predictable?

Making the cloud work for software producers  
Linking architecture, operating cost and revenue

High-performance SIMD implementation of the lattice-Boltzmann method on the Xeon Phi processor

A comparison of security assurance support of agile software development methods

Generative part-based Gabor object detector

Patterns for safety system bus architecture

Robotic process automation - Creating value by digitalizing work in the private healthcare?

Automatic word count estimation from daylong child-centered recordings in various language environments using language-independent syllabification of speech

Haptic feedback of gaze gestures with glasses  
Localization accuracy and effectiveness

Glasses with haptic feedback of gaze gestures

Touch gestures in communicating emotional intention via vibrotactile stimulation

Casual immersive viewing with smartphones

A movable immaterial volumetric display

Feature synthesis for image classification and retrieval via one-against-all perceptrons

Gaussian mixture models for signal mapping and positioning

Gaze-contingent scrolling and reading patterns

An exploratory study of eye typing fundamentals  
Dwell time, text entry rate, errors, and workload

On the costs of multiple trajectory pointing methods

Image database TID2013  
Peculiarities, results and perspectives

Methods and tools for denoising of complex-valued images based on block-matching and high order singular value decomposition

Blind estimation of white Gaussian noise variance in highly textured images

Additional lossless compression of JPEG images based on BPG

Phase masks optimization for broadband diffractive imaging

Human-technology choreographies

Re-thinking body, movement and space in interaction design

A lightweight many-to-many authentication protocol for near field communications

Distant speech separation using predicted time-frequency masks from spatial features

Time Difference of Arrival Estimation of Speech Signals Using Deep Neural Networks with Integrated Time-frequency Masking

Information retrieval approach to meta-visualization

Information retrieval perspective to meta-visualization

Generative modeling for maximizing precision and recall in information visualization

Reproducible Evaluation of System Efficiency with a Model of Architecture  
From Theory to Practice

Deep Temporal Logistic Bag-of-features for Forecasting High Frequency Limit Order Book Time Series

Variance Preserving Initialization for Training Deep Neuromorphic Photonic Networks with Sinusoidal Activations

Adaptive Normalization for Forecasting Limit Order Book Data Using Convolutional Neural Networks

Exploring the role of ten universal values in using products and services

Towards secure cloud orchestration for multi-cloud deployments

Domain based storage protection with secure access control for the cloud

Optimizing spatial and temporal reuse in wireless networks by decentralized partially observable markov decision processes

Compatible natural gradient policy search

Seniors and text messaging on mobile touchscreen phones

Continuum approach to high-cycle fatigue. The finite life-time case with stochastic stress history

Challenges of Multi-Factor Authentication for Securing Advanced IoT Applications

Layers of user expectations of future technologies  
An early framework

System integration for real-time mobile manipulation

A time-optimal bounded velocity path-following controller for generic Wheeled Mobile Robots

Designing for experiences with socially interactive robots

Low-Power Reconfigurable Miniature Sensor Nodes for Condition Monitoring

Serverless  
What it Is, What to Do and What Not to Do

Checking visual data flow programs with finite process models

Database-driven tool support for DisCo executable specifications

Need to touch, wonder of discovery, and social capital  
Experiences with interactive playful seats

OASIS deck of cards - House of colleagues  
A playful

MurMur Moderators, the talking playful seats

Social features in hybrid board game marketing material

Effects of directional haptic and non-speech audio cues in a cognitively demanding navigation task

Power mitigation of a heterogeneous multicore architecture on FPGA/ASIC by DFS/DVFS techniques

Convex Energy Optimization of Streaming Applications for MPSoCs

A quasi-virtual online analyser based on an artificial neural networks and offline measurements to predict purities of raffinate/extract in simulated moving bed processes

Estimation of time-varying room impulse responses of multiple sound sources from observed mixture and isolated source signals

Social human-robot interaction in the wild  
A workshop proposal for academic mindtrek 2020

LTE indoor MIMO performances field measurements

Ensembles of dense and dense sampling descriptors for the HEp-2 cells classification problem

Mobiscool  
1<sup>st</sup> workshop on mobile, social and culturally oriented learning

SiMPE  
8th workshop on speech and sound in mobile and pervasive environments

SiMPE  
7th Workshop on speech and sound in mobile and pervasive environments

Optimized viewport dependent streaming of stereoscopic omnidirectional video

Challenges in developing data-based value creation

Exploiting subclass information in one-class support vector machine for video summarization

Children designing videos  
Tools, pedagogical models, and best practices for digital storytelling and media-making in the classroom

Controlled experiments comparing fault-tree-based safety analysis techniques

Gamified crowdsourcing  
Conceptualization, literature review, and future agenda

How to design gamification? A method for engineering gamified software

Towards certifying the testing process of open-source software  
New challenges or old methodologies?

Guidelines for improving the testing process of open source software

Configuring and visualizing the data resources in a cloud-based data collection framework

A multi-agent approach for processing industrial enterprise data

Barriers for bridging interpersonal gaps  
Three inspirational design patterns for increasing collocated social interaction

Facilitating the first move  
Exploring inspirational design patterns for aiding initiation of social encounters

Compression of signs of DCT coefficients for additional lossless compression of JPEG images

FS-PGBR  
A scalable and delay sensitive cloud routing protocol

The lord of the sense  
A privacy preserving reputation system for participatory sensing applications

The Lord of the shares  
Combining attribute-based encryption and searchable encryption for flexible data sharing

Dominant Rotated Local Binary Patterns (DRLBP) for texture classification

Texture classification using dense micro-block difference

Special Issue on Embedded Computer Systems: Architectures, Modeling and Simulation

Mashing Up Software Issue Management, Development, and Usage Data

Software visualization today - Systematic literature review

Continuous Edgewise  
Dictionary-based disambiguation instead of explicit segmentation by the user

Fault tolerant control architecture design for mobile manipulation in scientific facilities

HCI and homecare  
Connecting families and clinicians

Cultural influence on online community use  
A cross-cultural study on online exercise diary users of three nationalities

Low-energy graph fourier basis functions span salient objects

Elastic image registration for guiding focal laser ablation of prostate cancer  
Preliminary results

Coordinating proactive social devices in a mobile cloud  
Lessons learned and a way forward

Action-Oriented Programming Model  
Collective Executions and Interactions in the Fog

Improving the delivery cycle  
A multiple-case study of the toolchains in Finnish software intensive enterprises

Revisiting continuous deployment maturity  
A two-year perspective

Redundancy-based visual tool center point pose estimation for long-reach manipulators

Information wall  
Evaluation of a gesture-controlled public display

Designing tactile feedback for piezo buttons

DevOps in practice  
A multiple case study of five companies

Systematic literature review on user logging in virtual reality

Log analysis of 360-degree video users via MQTT

Antroposeeni - A mixed reality game

DYNAMO sound engine - Exploring the aesthetics of dynamic sound interactions

'Aie-studio' - A pragmatist aesthetic approach for procedural sound design

Game postmortems vs. developer Reddit AMAs  
Computational analysis of developer communication

Wrench feasible workspace analysis of cable-driven parallel manipulators using LMI approach

Indirect measurement of the vascular endothelial glycocalyx layer thickness in human submucosal capillaries with a plugin for ImageJ

A design framework for mapping vectorized synchronous dataflow graphs onto CPU-GPU platforms

Memory-Constrained vectorization and scheduling of dataflow graphs for hybrid CPU-GPU platforms

Models for mobile application maintenance based on update history

A preliminary network analysis on steam game tags  
Another way of understanding game genres

Sensor-Based Cooperative Multi-Antenna Spectrum Sensing with Imperfect Reporting Channels

The highways and country roads to continuous deployment

Two patterns for minimizing human resources in a startup

Four patterns for internal startups

Patterns for subsidiaries as innovation tools

Using and collecting fine-grained usage data to improve online learning materials

Predicting academic success based on learning material usage

Analyzing Forty years of software maintenance models

Estimating software development effort based on phases

MVP Explained

A Systematic Mapping Study on the Definitions of Minimal Viable Product

Are SonarQube Rules Inducing Bugs?

Some SonarQube issues have a significant but small effect on faults and changes. A large-scale empirical study

Does migrating a monolithic system to microservices decrease the technical debt?

Does code quality affect pull request acceptance? An empirical study

Kvazaar 2.0

Fast and efficient open-source HEVC inter encoder

Preventing keystroke based identification in open data sets

Comparison of time metrics in programming

The effect of challenge-based gamification on learning

An experiment in the context of statistics education

Focused multi-task learning in a Gaussian process framework

Prototyping real-Time tracking systems on mobile devices

High-performance and low-energy buffer mapping method for multiprocessor DSP systems

An accumulative fusion architecture for discriminating people and vehicles using acoustic and seismic signals

A joint target localization and classification framework for sensor networks

Long-term tracking through failure cases

Towards component-aware function point measurement

On the definition of dynamic software measures

An empirical investigation of perceived reliability of open source Java programs

Predicting OSS trustworthiness on the basis of elementary code assessment

Optimal sensing via multi-armed bandit relaxations in mixed observability domains

Multi-robot active information gathering with periodic communication

Symbol diversification of linux binaries

DevOps in regulated software development  
Case medical devices

Flow-bounded trajectory-scaling algorithm for hydraulic robotic manipulators

Barriers to task-based information access in molecular medicine

Goofy Mus, grumpy Mur and dirty Muf  
Talking playful seats with personalities

Designing and evaluating text entry methods

The visual object tracking VOT2013 challenge results

On application of rational Discrete Short Time Fourier Transform in epileptic seizure classification
