

Considerations in analysing elemental carbon from marine engine exhaust using residual, distillate and biofuels

Technology review
prototyping platforms for monitoring ambient conditions

Use of a PPS sensor in evaluating the impact of fuel efficiency improvement technologies on the particle emissions of a euro 5 diesel car

Applicability of the Pegasor particle sensor to measure particle number, mass and PM emissions

Evaluation of an oxidation catalyst ("catalytic stripper") in eliminating volatile material from combustion aerosol

Comparative performance of a thermal denuder and a catalytic stripper in sampling laboratory and marine exhaust aerosols

The critical velocity of rebound determined for sub-micron silver particles with a variable nozzle area impactor

Differential diffusion analyzer

Fate of metallic engineered nanomaterials in constructed wetlands
prospection and future research perspectives

Thermophilic anaerobic digestion of pulp and paper mill primary sludge and co-digestion of primary and secondary sludge
Julkaisun otsikon käännös: : Thermophilic anaerobic digestion of pulp and paper mill primary sludge and co-digestion of primary and secondary sludge

Impact of the dropping activity with vehicle age on air pollutant emissions

Remediation of sedimented fiber originating from pulp and paper industry
Laboratory scale anaerobic reactor studies and ideas of scaling up

Improving urban air quality measurements by a diffusion charger based electrical particle sensors
A field study in Beijing, China

Effect of temperature on selenium removal from wastewater by UASB reactors

Biohydrogen production from xylose by fresh and digested activated sludge at 37, 55 and 70 °C

The mechanism of the oxidation of benzyl alcohol by iron(III)nitrate
Conventional versus microwave heating

Building energy-efficiency interventions in North-East Europe
Effects on indoor environmental quality and public health

Methane oxidation in a boreal climate in an experimental landfill cover composed from mechanically-biologically treated waste

Mechanically-biologically treated municipal solid waste as a support medium for microbial methane oxidation to mitigate landfill greenhouse emissions

Sorption of zinc onto elemental selenium nanoparticles immobilized in *Phanerochaete chrysosporium* pellets

Review of motor vehicle particulate emissions sampling and measurement
From smoke and filter mass to particle number

Quantitative characterization of pore structure of several biochars with 3D imaging

Removal and recovery of uranium(VI) by waste digested activated sludge in fed-batch stirred tank reactor

Chasing measurements for real-world emissions of city buses

Extending the Faraday cup aerosol electrometer based calibration method up to 5 μm

Particle emissions of Euro VI, EEV and retrofitted EEV city buses in real traffic

Anaerobic solubilisation of nitrogen from municipal solid waste (MSW)

Real-time effective density monitor (DENSMO) for aerosol nanoparticle production

Fabrication of fiber filters with antibacterial properties for VOC and particle removal

Evaluating Particulate Emissions from a Flexible Fuel Vehicle with Direct Injection when Operated on Ethanol and Iso-butanol Blends

Performance of ventilation filtration technologies on characteristic traffic related aerosol down to nanocluster size

Experimental Investigation of Cyclic Variability on Combustion and Emissions of a High-Speed SI Engine

Landfill methane oxidation in engineered soil columns at low temperature

Mesophilic anaerobic digestion of pulp and paper industry biosludge-long-term reactor performance and effects of thermal pretreatment

Anaerobic digestion of 30–100-year-old boreal lake sedimented fibre from the pulp industry
Extrapolating methane production potential to a practical scale

Biochemical changes of fresh water cyanobacteria *dolichospermum flos-aquae* NTMS07 to chromium-induced stress with special reference to antioxidant enzymes and cellular fatty acids

Applicability of optical and diffusion charging-based particulate matter sensors to urban air quality measurements

Triboelectric charging of fungal spores during resuspension and rebound

Vertical profiles of lung deposited surface area concentration of particulate matter measured with a drone in a street canyon

Power generation in fed-batch and continuous up-flow microbial fuel cell from synthetic wastewater

Recovering Nitrogen as a Solid without Chemical Dosing
Bio-Electroconcentration for Recovery of Nutrients from Urine

Indoor thermal environment, air exchange rates, and carbon dioxide concentrations before and after energy retro fits in Finnish and Lithuanian multi-family buildings

Release and characteristics of fungal fragments in various conditions

CFD based reactivity parameter determination for biomass particles of multiple size ranges in high heating rate devolatilization

Application of the Pegasor Particle Sensor for the Measurement of Mass and Particle Number Emissions

Application of the pegasor particle sensor for the measurement of mass and particle number emissions

Use of a catalytic stripper as an alternative to the original PMP measurement protocol

Use of a Catalytic Stripper as an Alternative to the Original PMP Measurement Protocol

Exhaust particle sensor for OBD application

Simulation of the Formation Process of Diesel Exhaust Particle Emissions

Modelling particle distribution using combined power-law and log-normal distribution model

Modelling new particle formation and growth using combined power law and log-normal distribution model

Finding H₂SO₄-H₂O nucleation rates in high H₂SO₄ concentrations

Investigating the kinetics and biofuel properties of *Alstonia congensis* and *Ceiba pentandra* via torrefaction

Improving the signal-to-noise ratio of Faraday cup aerosol electrometer based aerosol instrument calibrations

Breaking dormancy
An energy-efficient means of recovering astaxanthin from microalgae

Organic silicon compounds in biogases produced from grass silage, grass and maize in laboratory batch assays
Julkaisun otsikon käännös: : Organic silicon compounds in biogases produced from grass silage, grass and maize in laboratory batch assays

Landfill gas upgrading with countercurrent water wash

Characterization of charge in airborne fungal spores

Flow rate-independent electrical aerosol sensor

Seasonal and diurnal variations of fluorescent bioaerosol concentration and size distribution in the urban environment

Identification of single microbial particles using electro-dynamic balance assisted laser-induced breakdown and fluorescence spectroscopy

Performance evaluation of the HR-ELPI + inversion

Emission measurements with gravimetric impactors and electrical devices
An aerosol instrument comparison

Downstream integration of microalgae harvesting and cell disruption by means of cationic surfactant-decorated Fe_3O_4 nanoparticles

Characterization of laboratory and real driving emissions of individual Euro 6 light-duty vehicles – Fresh particles and secondary aerosol formation

Anaerobic treatment of LCFA-containing synthetic dairy wastewater at 20°C
Process performance and microbial community dynamics

Weathering of gasification and grate bottom ash in anaerobic conditions

Detailed internal characterisation of two Finnish landfills by waste sampling

Internal leachate quality in a municipal solid waste landfill
Vertical, horizontal and temporal variation and impacts of leachate recirculation

Bio-electrochemical conversion of industrial wastewater-COD combined with downstream methanol synthesis-an economic and life cycle assessment

Aqueous synthesis of Z-scheme photocatalyst powders and thin-film photoanodes from earth abundant elements

Thermophilic aerobic wastewater treatment, process performance, biomass characteristics, and effluent quality

HPLC-SEC
a new approach to characterise complex wastewater effluents

Selenate removal in biofilm systems
Effect of nitrate and sulfate on selenium removal efficiency, biofilm structure and microbial community

Biological treatment of selenium-laden wastewater containing nitrate and sulfate in an upflow anaerobic sludge bed reactor at pH 5.0

Methodological approaches for fractionation and speciation to estimate trace element bioavailability in engineered anaerobic digestion ecosystems
An overview
