

Strategy formation in construction firms

Lähtökohtia tie- ja rataverkon peruspalvelutason määrittämiselle

Project feedback as a tool for learning

Computational design concept analysis
A Nordic comparison of four apartment buildings

Precision refurbishment of buildings
A façade refurbishment case study

Sensing resolution and measurement range of a passive wireless strain sensor

Shear buckling and resistance of thin-walled steel plate at non-uniform elevated temperatures

Briefing
Initial findings from the urba project

Cost optimal and nearly zero (nZEB) energy performance calculations for residential buildings with REHVA definition for nZEB national implementation

Liikennetekniikan perusteet
Opetusmoniste

Passive frequency doubling antenna sensor for wireless strain sensing

Structural behaviour of long integral abutment bridges

Wireless crack sensing using an RFID-based folded patch antenna

Financial viability of energy-efficiency measures in a new detached house design in Finland

Implementation of a direct procedure for critical point computations using preconditioned iterative solvers

Integration of BIM and automation in high-rise building construction

Passive wireless antenna sensor for strain and crack sensing - Electromagnetic modeling, simulation, and testing

A slotted patch antenna for wireless strain sensing

BIM based schedule control for precast concrete supply chain

Crack propagation measurement using a battery-free slotted patch antenna sensor

Stretching risk management standards
Multi-organizational perspectives

The impact of occupancy patterns, occupant-controlled ventilation and shading on indoor overheating risk in domestic environments

The relative importance of input weather data for indoor overheating risk assessment in dwellings

Using probabilistic sampling-based sensitivity analyses for indoor air quality modelling

Commissioning for nearly zero-energy building projects

Evaluation of thermo-mechanical behaviour of composite energy piles during heating/cooling operations

ÄKK Loppuraportti
rakennusten ääniolosuhteiden käyttäjälähtöinen kehittäminen

Debonding and impact damage in stainless steel fibre metal laminates prior to metal fracture
Julkaisun otsikon käännös: : Debonding and impact damage in stainless steel fibre metal laminates prior to metal fracture

Experimental study on the behavior of wear resistant steels under high velocity single particle impacts

Pyöräväylien tiedot ja laatutaso

Structural analysis of tubular truss in fire

The target reliability of the eurocodes

WIN-WINTER - Nordic winter road maintenance research program. Preliminary study
Project report

WIN-WINTER - Tie- ja katuverkon talvihoidon tutkimusohjelma. Esiselvitys
Raportti tuloksista

Measured energy consumption of educational buildings in a Finnish city

The assessment of constructability
BIM cases

Understanding fundamental and practical ingredients of construction project data management

Role and nature of systemic innovations in construction and real estate sector

Urban social housing resilience to excess summer heat

Divertor remote handling for DEMO
Concept design and preliminary FMECA studies

Analysis of thermo-active pile structures and their performance under groundwater flow conditions

Impact of building usage and occupancy on energy consumption in Finnish daycare and school buildings

Acoustics of vanished 19th century concert halls in Helsinki

Auralization of vanished 19th century concert halls in Helsinki

Tuulettuvien yläpohjien lämpö- ja kosteustekninen toiminta nykyisessä ja tulevaisuuden ilmastossa

Assessing uncertainty in housing stock infiltration rates and associated heat loss
English and UK case studies

Koko Julkisivua peittävän lasijulkisivun vaikutus Etelä-Ruotsissa sijaitsevan rakennuksen energiatehokkuuteen

Lasitetun parvekkeen lämpötilan ja lämpöhäviöiden laskenta

Raudotteiden korroosionopeuden määrittäminen betonijulkisivussa korkean aikaresoluution säädätin avulla

Uudessa COMBI-hankkeessa tutkitaan energiatehokkaan palvelurakentamisen haasteita ja ratkaisuja

ÄKK-hankkeen suositukset tulevaisuuden ääneneristysmääräyksiä koskien

Menetelmä parvekelasien ääneneristävyyden mitoittamiseksi liikennemelualueilla

Puurunkoisten tuuletettujen yläpohjien kosteustekninen toiminta

Puuvälipohjien akustiset ominaisuudet

Airtightness of residential buildings in Finland

Improving the thermal performance of concrete-sandwich envelopes in relation to the moisture behaviour of building structures in boreal conditions

Bus Transportation Accessibility - Does It Impact Housing Values?

Effects of added glazing on Balcony indoor temperatures
Field measurements

Practical experiences from several moisture performance assessments

Surrogate modeling for initial rotational stiffness of welded tubular joints

Two models for hydraulic cylinders in flexible multibody simulations

Validation of the method to evaluate the corrosion propagation stage by hygrothermal simulation

Pre-use phase LCA of a multi-story residential building
Can greenhouse gas emissions be used as a more general environmental performance indicator?

Tuulettuvat julkisivut 2016, by 64

Mapping indoor overheating and air pollution risk modification across Great Britain
A modelling study

The effect of climate change on the amount of wind driven rain on concrete facades

Effects of strain rate and confining pressure on the compressive behavior of Kuru granite

Energy saving in working hydraulics of long booms in heavy working vehicles

Eriste- ja levyrappaus 2016, by 57

The effect of climate change on freeze-thaw durability of concrete structures in Finland

Energy saving and indoor climate effects of an added glazed facade to a brick wall building
Case study

Stress relaxation in tempered glass caused by heat soak testing

Solar Panel Breakage During Heavy Rain Caused by Thermal Stress

Consideration of energy consumption, energy costs, and space occupancy in Finnish daycare centres and school buildings

Editorial to "The best papers from the 32nd International Symposium on Automation and Robotics in Construction and Mining (ISARC 2015)"

Instrumentation and fe analysis of a large-span culvert built under a railway, in Finland

Multicriteria selection in concept design of a divertor remote maintenance port in the EU DEMO reactor using an AHP participative approach

Designers' performance evaluation in construction projects

The corrosion rate in reinforced concrete facades exposed to outdoor environment

Overheating in English dwellings
comparing modelled and monitored large-scale datasets

Effect of energy measures on the values of energy efficiency indicators in Finnish daycare and school buildings

Output power variation of different PV array configurations during irradiance transitions caused by moving clouds

The effect of matrix type on ageing of thick vinyl ester glass-fibre-reinforced laminates

Carbon dioxide permeability of building materials and their impact on bedroom ventilation need

A generic method to optimize a redundant serial robotic manipulator's structure

Julkisivujen ja parvekkeiden talvikorjausohje

Relationships among Civil Engineering Students' Approaches to Learning, Perceptions of the Teaching-Learning Environment, and Study Success
