Cross-sectional analysis of more than 100,000 web-survey responses

Face verification and recognition for digital forensics and information security

Functional electrical stimulation for facial pacing

Effects of waveforms on movement intensity and ratings of discomfort

Fusion enhancement for tracking of respiratory rate through intrinsic mode functions in photoplethysmography

Hardware-in-the-loop platform for testing autonomous vehicle control algorithms

Identification of motor symptoms related to Parkinson disease using motion-tracking sensors at home (KÄVELI)
Protocol for an observational case-control study

Identification of Parkinson's Disease Utilizing a Single Self-recorded 20-step Walking Test Acquired by Smartphone's Inertial Measurement Unit

Improving hospital services based on patient experience data
Current feedback practices and future opportunities

Indirect measurement of the vascular endothelial glycocalyx layer thickness in human submucosal capillaries with a plugin for ImageJ

Mobile mental wellness training for stress management
Feasibility and design implications based on a one-month field study

Mobile Microservice Architecture for Patients Self-Care

Network signatures based on gene pair expression ratios improve classification and the analysis of muscle-invasive urothelial cancer

On computation of calcium cycling anomalies in cardiomyocytes data

Open framework for mammography-based breast cancer risk assessment

Optimized wake-up scheme with bounded delay for energy-efficient MTC

Parametric exploration of cellular swelling in a computational model of cortical spreading depression

Prototyping directional UAV-based wireless access and backhaul systems
