

1700 nm dispersion managed mode-locked bismuth fiber laser

A Bayesian analysis of the chromosome architecture of human disorders by integrating reductionist data

Active optical clock based on four-level quantum system

Added value of autoregulation and multi-step kinetics of transcription initiation

Aerosol gas exchange system (AGES) for nanoparticle sampling at elevated temperatures
Modeling and experimental characterization

A Highly Efficient Sensor Platform Using Simply Manufactured Nanodot Patterned Substrates

Analysis of spatial heterogeneity in normal epithelium and preneoplastic alterations in mouse prostate tumor models

An ensemble of classifiers based on different texture descriptors for texture classification

An Optical Method for the In-Vivo Characterization of the Biomechanical Response of the Right Ventricle

Atomistic determinants of co-enzyme Q reduction at the Q₁-site of the cytochrome bc₁ complex

Automatic classification of IgA endomysial antibody test for celiac disease
a new method deploying machine learning

Automatic knee osteoarthritis diagnosis from plain radiographs
A deep learning-based approach

Automatic Posture and Movement Tracking of Infants with Wearable Movement Sensors

Automatization and stress analysis data of CoCr laser weld fatigue tests

Behaviour of one-step spray-coated carbon nanotube supercapacitor in ambient light harvester circuit with printed organic solar cell and electrochromic display

Bioinspired underwater locomotion of light-driven liquid crystal gels

Brain hemodynamic activity during viewing and re-viewing of comedy movies explained by experienced humor

Caustics and rogue waves in an optical sea

Changes in hemodynamics associated with metabolic syndrome are more pronounced in women than in men

Chromatin organization regulates viral egress dynamics

Combining deep learning with token selection for patient phenotyping from electronic health records

Comparative proteomics reveals human pluripotent stem cell-derived limbal epithelial stem cells are similar to native ocular surface epithelial cells

Comparison of electron injection and recombination on TiO_2 nanoparticles and ZnO nanorods photosensitized by phthalocyanine

Curved optical solitons subject to transverse acceleration in reorientational soft matter

DroneRF dataset

A dataset of drones for RF-based detection, classification and identification

Dynamical heart beat correlations during running

Effects of Sintering Temperature on Crystallization and Fabrication of Porous Bioactive Glass Scaffolds for Bone Regeneration

Emergent rogue wave structures and statistics in spontaneous modulation instability

Entropy analysis of word-length series of natural language texts

Effects of text language and genre

Facile strain analysis of largely bending films by a surface-labelled grating method

First passage time distribution in heterogeneity controlled kinetics

Going beyond the mean first passage time

Gaussian Light Model in Brightfield Optical Projection Tomography

Genetic similarity of biological samples to counter bio-hacking of DNA-sequencing functionality

Genome-wide modeling of transcription kinetics reveals patterns of RNA production delays

Genomically amplified Akt3 activates DNA repair pathway and promotes glioma progression

Glucosylceramide modifies the LPS-induced inflammatory response in macrophages and the orientation of the LPS/TLR4 complex in silico

Highly ductile amorphous oxide at room temperature and high strain rate

Highly-Sensitive Refractive Index Sensing by Near-infrared Metatronic Nanocircuits

Human iPSC derived disease model of MERTK-associated retinitis pigmentosa

Infiltrated bunch of solitons in Bi-doped frequency-shifted feedback fibre laser operated at 1450 nm

Information transfer in QT-RR dynamics

Application to QT-correction

Insulin resistance is associated with altered amino acid metabolism and adipose tissue dysfunction in normoglycemic women

Interleukin-6 and microRNA profiles induced by oral bacteria in human atheroma derived and healthy smooth muscle cells

In vitro Evaluation of Porous borosilicate, borophosphate and phosphate Bioactive Glasses Scaffolds fabricated using Foaming Agent for Bone Regeneration

Lower bound for the spatial extent of localized modes in photonic-crystal waveguides with small random imperfections

Machine learning analysis of rogue solitons in supercontinuum generation

Mechanically driven strategies to improve electromechanical behaviour of printed stretchable electronic systems

Mechanism of homodimeric cytokine receptor activation and dysregulation by oncogenic mutations

Mechanistic principles underlying regulation of the actin cytoskeleton by phosphoinositides

Membrane omega-3 fatty acids modulate the oligomerisation kinetics of adenosine A_{2A} and dopamine D_2 receptors

Molecular mechanisms of Charcot-Marie-Tooth neuropathy linked to mutations in human myelin protein P2

Multicomponent new particle formation from sulfuric acid, ammonia, and biogenic vapors

Multilayer Aggregation with Statistical Validation
Application to Investor Networks

Multimodal Machine Learning-based Knee Osteoarthritis Progression Prediction from Plain Radiographs and Clinical Data

N-Glycosylation as determinant of epidermal growth factor receptor conformation in membranes

Non-toxic printed supercapacitors operating in sub-zero conditions

On the linear programming bound for linear Lee codes

Optical detection of radon decay in air

Optimized dispersion quality of aqueous carbon nanotube colloids as a function of sonochemical yield and surfactant/CNT ratio

Parkinson's disease detection from 20-step walking tests using inertial sensors of a smartphone
Machine learning approach based on an observational case-control study

Personalized Monitoring and Advance Warning System for Cardiac Arrhythmias

Porous poly-L-lactide-co-1-caprolactone scaffold
A novel biomaterial for vaginal tissue engineering

Proton-coupled electron transfer and the role of water molecules in proton pumping by cytochrome c oxidase

Quasi two-dimensional astigmatic solitons in soft chiral metastructures

Rapid growth of new atmospheric particles by nitric acid and ammonia condensation

Rate-limiting steps in transcription dictate sensitivity to variability in cellular components

Real sequence effects on the search dynamics of transcription factors on DNA

Real-time characterization of spectral instabilities in a mode-locked fibre laser exhibiting soliton-similariton dynamics

Redox-coupled quinone dynamics in the respiratory complex I

Redox-induced activation of the proton pump in the respiratory complex I

Ricci-flow based conformal mapping of the proximal femur to identify exercise loading effects

Scaling and correlation properties of RR and QT intervals at the cellular level

Segmented molecular design of self-healing proteinaceous materials

Selective effect of cell membrane on synaptic neurotransmission

Sensitivity enhancement of flexible gas sensors via conversion of inkjet-printed silver electrodes into porous gold counterparts

Step down Vascular Calcification Analysis using State-of-the-Art Nanoanalysis Techniques

Structure and permeation mechanism of a mammalian urea transporter

Structure-phenotype correlations of human CYP21A2 mutations in congenital adrenal hyperplasia

Subangstrom resolution x-ray structure details aquaporin-water interactions

Sub-parts-per-trillion level sensitivity in trace gas detection by cantilever-enhanced photo-acoustic spectroscopy

Superdiffusion dominates intracellular particle motion in the supercrowded cytoplasm of pathogenic *Acanthamoeba castellanii*

Surface-Enhanced Impulsive Coherent Vibrational Spectroscopy

The evolutionary history of lethal metastatic prostate cancer

Three-Dimensional Printing of the Nasal Cavities for Clinical Experiments

Tooth wear and dentoalveolar remodeling are key factors of morphological variation in the Dmanisi mandibles

Traffic is a major source of atmospheric nanocluster aerosol

Transient formation of water-conducting states in membrane transporters

Trends for isolated amino acids and dipeptides

Conformation, divalent ion binding, and remarkable similarity of binding to calcium and lead

Upstream Transcription Factor 1 (USF1) allelic variants regulate lipoprotein metabolism in women and USF1 expression in atherosclerotic plaque

Using multi-step proposal distribution for improved MCMC convergence in Bayesian network structure learning

Variance-corrected Michaelis-Menten equation predicts transient rates of single-enzyme reactions and response times in bacterial gene-regulation

X-ray microtomography is a novel method for accurate evaluation of small-bowel mucosal morphology and surface area

Speeding up crystallization

Väitöstilaisuus yliopiston imagonluojana

Extensive transduction of nonrepetitive DNA mediated by L1 retrotransposition in cancer genomes

Physical chemistry

Water's wafer-thin surface
