

A generic method to optimize a redundant serial robotic manipulator's structure

Airtightness of residential buildings in Finland

A life cycle assessment of two residential buildings using two different LCA database-software combinations
Recognizing uniformities and inconsistencies

Analysis of thermo-active pile structures and their performance under groundwater flow conditions

An approach to combining related notifications in large-scale building management systems with a rehabilitation facility case study

Assessing population vulnerability towards summer energy poverty
Case studies of Madrid and London

Assessing uncertainty in housing stock infiltration rates and associated heat loss
English and UK case studies

Behaviour of riveted stringer-to-floorbeam connections in cyclic load tests to failure

Briefing
Initial findings from the urba project

Carbon dioxide permeability of building materials and their impact on bedroom ventilation need

Characterization of elastic constants of anisotropic composites in compression using digital image correlation

Cold-formed RHS T joints with initial geometrical imperfections

Commissioning for nearly zero-energy building projects

Computational design concept analysis
A Nordic comparison of four apartment buildings

Condensation at the exterior surface of windows

Consideration of energy consumption, energy costs, and space occupancy in Finnish daycare centres and school buildings

Core Project Team As a Management Entity for Construction Projects

Cost optimal and nearly zero (nZEB) energy performance calculations for residential buildings with REHVA definition for nZEB national implementation

Debonding and impact damage in stainless steel fibre metal laminates prior to metal fracture
Julkaisun otsikon käännös: : Debonding and impact damage in stainless steel fibre metal laminates prior to metal fracture

Designers' performance evaluation in construction projects

Divertor remote handling for DEMO
Concept design and preliminary FMECA studies

Effect of energy measures on the values of energy efficiency indicators in Finnish daycare and school buildings

Effects of added glazing on Balcony indoor temperatures
Field measurements

Effects of strain rate and confining pressure on the compressive behavior of Kuru granite

Energy saving and indoor climate effects of an added glazed facade to a brick wall building
Case study

Energy saving in working hydraulics of long booms in heavy working vehicles

Evaluating retrofit options in a historical city center
Relevance of bio-based insulation and the need to consider complex urban form in decision-making

Evaluation of thermo-mechanical behaviour of composite energy piles during heating/cooling operations

Experimental study on the behavior of wear resistant steels under high velocity single particle impacts

Financial viability of energy-efficiency measures in a new detached house design in Finland

Heat protective properties of enclosure structure from thin-wall profiles with foamed concrete

Hot-box measurements to investigate the internal convection of highly insulated loose-fill insulation roof structures

Impact of building usage and occupancy on energy consumption in Finnish daycare and school buildings

Impacts of multiple refurbishment strategies on hygrothermal behaviour of basement walls
Julkaisun otsikon käännös: : Maanvastaisten seinien korjausvaihtoehtojen lämpö- ja kosteustekninen toiminta

Implementation of a direct procedure for critical point computations using preconditioned iterative solvers

Improving the thermal performance of concrete-sandwich envelopes in relation to the moisture behaviour of building structures in boreal conditions

Initial axial stiffness of welded RHS T joints

Initial in-plane rotational stiffness of welded RHS T joints with axial force in main member

Instrumentation and fe analysis of a large-span culvert built under a railway, in Finland

Investigating the kinetics and biofuel properties of *Alstonia congensis* and *Ceiba pentandra* via torrefaction

Mapping indoor overheating and air pollution risk modification across Great Britain
A modelling study

Measured energy consumption of educational buildings in a Finnish city

Modeling of hygrothermal behavior for green facade's concrete wall exposed to nordic climate using artificial intelligence and global sensitivity analysis

Modelling the stressed skin effect by using shell elements with meta-material model

Moment-rotation behavior of welded tubular high strength steel T joint

Multicriteria selection in concept design of a divertor remote maintenance port in the EU DEMO reactor using an AHP participative approach

Output power variation of different PV array configurations during irradiance transitions caused by moving clouds

Overheating in English dwellings
comparing modelled and monitored large-scale datasets

Parametric study on temperature distribution of square hollow section joints

Passive wireless antenna sensor for strain and crack sensing - Electromagnetic modeling, simulation, and testing

People's current mobility costs and willingness to pay for Mobility as a Service offerings

Precision refurbishment of buildings
A façade refurbishment case study

Pre-use phase LCA of a multi-story residential building
Can greenhouse gas emissions be used as a more general environmental performance indicator?

Radon, fungal spores and MVOCs reduction in crawl space house
A case study and crawl space development by hygrothermal modelling

Recycling lithium mine tailings in the production of low temperature (700–900°C) ceramics
Effect of ladle slag and sodium compounds on the processing and final properties

Relationships among Civil Engineering Students' Approaches to Learning, Perceptions of the Teaching-Learning Environment, and Study Success

Remote diagnostics application software for remote handling equipment

Role and nature of systemic innovations in construction and real estate sector

Strategy formation in construction firms

Stress relaxation in tempered glass caused by heat soak testing

Stretching risk management standards
Multi-organizational perspectives

Surrogate modeling for initial rotational stiffness of welded tubular joints

Techno-economic evaluation of integrating torrefaction with anaerobic digestion

The assessment of constructability
BIM cases

The corrosion rate in reinforced concrete facades exposed to outdoor environment

The effect of matrix type on ageing of thick vinyl ester glass-fibre-reinforced laminates

The effect of steel grade on weight and cost of warren-type welded tubular trusses

The impact of occupancy patterns, occupant-controlled ventilation and shading on indoor overheating risk in domestic environments

The relative importance of input weather data for indoor overheating risk assessment in dwellings

Uncertainty in the early phase of a municipal building refurbishment project-A case study in Finland

Understanding fundamental and practical ingredients of construction project data management

Using probabilistic sampling-based sensitivity analyses for indoor air quality modelling

Utilizing mixed-mineralogy ferroan magnesite tailings as the source of magnesium oxide in magnesium potassium phosphate cement

Utilizing the innovation potential of suppliers in construction projects

Variation of CPTu-based transformation models for undrained shear strength of Finnish clays

Behavior of capacitive humidity sensors in monitoring the drying of concrete walls

Calculation method to determine capillary properties of building materials with automatic free water intake test

Comparison between calculated and billed building energy consumption values of schools and daycare centers

Thermal and moisture properties of calcium silicate insulation boards

Reply to the discussion by koutsoftas on "evaluation of sample quality from different sampling methods in finnish soft sensitive clays"¹

Editorial to "The best papers from the 32nd International Symposium on Automation and Robotics in Construction and Mining (ISARC 2015)"

Practical experiences from several moisture performance assessments

Two models for hydraulic cylinders in flexible multibody simulations

Acoustics of vanished 19th century concert halls in Helsinki

ÄKK-hankkeen suositukset tulevaisuuden ääneneristysmääräyksiä koskien

Auralization of vanished 19th century concert halls in Helsinki

Julkisivujen ja parvekkeiden talvikorjausohje

Koko Julkisivua peittävän lasijulkisivun vaikutus Etelä-Ruotsissa sijaitsevan rakennuksen energiatehokkuuteen

Kosteusvaurioiden vakavuus kuntien rakennuksissa

Lasitetun parvekkeen lämpötilan ja lämpöhäviöiden laskenta

Maanvastaisten seinien lämpö- ja kosteustekninen toiminta

Menetelmä parvekelasien ääneneristävyyden mitoittamiseksi liikennemelualueilla
