

Growth of Urban Peripheries with Reference to Inconsistent Spatial Planning Policies: South-east Amman as case study

A comparative analysis of global datasets and initiatives for urban health and sustainability

Airtightness of residential buildings in Finland

Assessing uncertainty in housing stock infiltration rates and associated heat loss
English and UK case studies

Attitude-behaviour gap in energy issues
Case study of three different Finnish residential areas

Boundary Interaction in Emerging Scenes
Two Participatory Planning Cases from Finland

Briefing
Initial findings from the urba project

Building university-industry co-innovation networks in transnational innovation ecosystems
Towards a transdisciplinary approach of integrating social sciences and artificial intelligence

Built environment determinants of pedestrians' and bicyclists' route choices on commute trips
Applying a new grid-based method for measuring the built environment along the route

Clashing coalitions
A discourse analysis of an artificial groundwater recharge project in Finland

Consumer panel on the readiness of finns to behave in a more pro-environmental manner

Customer-oriented approach in cadastral procedures – Case study from Finland

Do matters of concern matter? bringing issues back to participation

Examining the rhythms of 'urban elements' on walking and driving routes in the city

Groundwater as a source of conflict and cooperation
Towards creating mutual gains in a finnish water supply project

Imágenes 2.5D basadas en información de reflectancia para la interpretación morfológica del patrimonio arquitectónico

Improved water services cooperation through clarification of rules and roles

Indicators for self-organization potential in urban context

Institutional entrepreneurship for knowledge regions
In search of a fresh set of questions for regional innovation studies

Institutional entrepreneurship, power, and knowledge in innovation systems
Institutionalization of regenerative medicine in Tampere, Finland

Landowners' willingness to promote bioenergy production on wasteland – future impact on land use of cutaway peatlands

Local or digital buzz, global or national pipelines

Patterns of knowledge sourcing in intelligent machinery and digital content services in Finland

Luhtaorvokki ja luonnon geopolitiikka

Making sense of the social

Human-nonhuman constellations and the wicked road to sustainability

Mapping indoor overheating and air pollution risk modification across Great Britain

A modelling study

Mapping the effects of urban heat island, housing, and age on excess heat-related mortality in London

Creating loose spaces?

Policy learning and the 'cluster-flavoured innovation policy' in Finland

Pre-use phase LCA of a multi-story residential building

Can greenhouse gas emissions be used as a more general environmental performance indicator?

Radon, fungal spores and MVOCs reduction in crawl space house

A case study and crawl space development by hygrothermal modelling

Road safety comparisons with international data on seriously injured

Technology valuation method for supporting knowledge management in technology decisions to gain sustainability

The effect of ground leases on house prices in Helsinki

The impact of occupancy patterns, occupant-controlled ventilation and shading on indoor overheating risk in domestic environments

The potential of biomethane in replacing fossil fuels in heavy transport-a case study on Finland

The relative importance of input weather data for indoor overheating risk assessment in dwellings

Tiedon synty kollektiivisessä lintujen havainnoinnissa

Lajiluettelon, paikan ja tietämisen vuorovaikutus

Urban housing density and infrastructure costs

Using probabilistic sampling-based sensitivity analyses for indoor air quality modelling

Arbitrary Land Use Policy in Jordan between Legal Brand and Property Control

Water supply and sanitation services in Finland before World War 2

Advances in determining Δu and S_u for limit equilibrium analyses

Determination of remoulding energy of sensitive clays

Effects of sample disturbance in the determination of soil parameters for advanced finite element modelling of sensitive clays

Problems related to field vane testing in soft soil conditions and improved reliability of measurements using an innovative field vane device

Beyond the City Limits

Creativity
