

Neurofunctional plasticity in fraction learning  
An fMRI training study

Assessment of PIV performance in validating CFD models from nasal cavity CBCT scans

Automatic assessment of the myoclonus severity from videos recorded according to standardized Unified Myoclonus Rating Scale protocol and using human pose and body movement analysis

A Computational Model of Interactions Between Neuronal and Astrocytic Networks  
The Role of Astrocytes in the Stability of the Neuronal Firing Rate

Tidal breathing flow profiles during sleep in wheezing children measured by impedance pneumography

Randomized Multiresolution Scanning in Focal and Fast E/MEG Sensing of Brain Activity with a Variable Depth

Membrane-Dependent Binding and Entry Mechanism of Dopamine into Its Receptor

Unique Features of Network Bursts Emerge From the Complex Interplay of Excitatory and Inhibitory Receptors in Rat Neocortical Networks

Viability of Mouse Retinal Explant Cultures Assessed by Preservation of Functionality and Morphology

Reduced level of docosahexaenoic acid shifts GPCR neuroreceptors to less ordered membrane regions

Improved EEG source localization with Bayesian uncertainty modelling of unknown skull conductivity

Diffusion tensor imaging and disability progression in multiple sclerosis  
A 4-year follow-up study

A realistic, accurate and fast source modeling approach for the EEG forward problem

Astrocyte lineage cells are essential for functional neuronal differentiation and synapse maturation in human iPSC-derived neural networks

Teaching semantics and skills for human-robot collaboration

Overview of Sources and Characteristics of Nanoparticles in Urban Traffic-Influenced Areas

Zeffiro User Interface for Electromagnetic Brain Imaging  
a GPU Accelerated FEM Tool for Forward and Inverse Computations in Matlab

Cognitive load and metacognitive confidence extraction from pupillary response

Assessment of mutation probabilities of KRAS G12 missense mutants and their long-timescale dynamics by atomistic molecular simulations and Markov state modeling

Improving efficiency in convolutional neural networks with multilinear filters

Negatively Charged Gangliosides Promote Membrane Association of Amphipathic Neurotransmitters

Epileptiform and periodic EEG activities induced by rapid sevoflurane anaesthesia induction

Nonlinear recurrent neural networks for finite-time solution of general time-varying linear matrix equations

A Primal Neural Network for Online Equality-Constrained Quadratic Programming

MetrIntMeas a novel metric for measuring the intelligence of a swarm of cooperating agents

Concerted regulation of npc2 binding to endosomal/lysosomal membranes by bis(monoacylglycero)phosphate and sphingomyelin

Inhibition of A $\beta$  Amyloid Growth and Toxicity by Silybins  
The Crucial Role of Stereochemistry

Measures of spike train synchrony for data with multiple time scales

Atomistic fingerprint of hyaluronan-CD44 binding

Calcium Assists Dopamine Release by Preventing Aggregation on the Inner Leaflet of Presynaptic Vesicles

CNN-based edge filtering for object proposals

Network-wide adaptive burst detection depicts neuronal activity with improved accuracy

Functional brain segmentation using inter-subject correlation in fMRI

Cell culture chamber with gas supply for prolonged recording of human neuronal cells on microelectrode array

Predicting symptom severity in autism spectrum disorder based on cortical thickness measures in agglomerative data

Spinal cord injury induces widespread chronic changes in cerebral white matter

Advanced boundary electrode modeling for tES and parallel tES/EEG

The relationship between recognition memory for emotion-laden words and white matter microstructure in normal older individuals

Effect of rhodopsin phosphorylation on dark adaptation in mouse rods

Morphological Differentiation Towards Neuronal Phenotype of SH-SY5Y Neuroblastoma Cells by Estradiol, Retinoic Acid and Cholesterol

Comparison of Feature Selection Techniques in Machine Learning for Anatomical Brain MRI in Dementia

How Many Is Enough? Effect of Sample Size in Inter-Subject Correlation Analysis of fMRI

One-Class Classification based on Extreme Learning and Geometric Class Information

Severe cerebral white matter lesions in ischemic stroke patients are associated with less time spent at home and early institutionalization

Eustachian tube mucosal inflammation scale validation based on digital video images

Elevated levels of soluble CD26 and CD30 in multiple sclerosis

Human anterior thalamic nuclei are involved in emotion-attention interaction

Building new computational models to support health behavior change and maintenance  
new opportunities in behavioral research

DropELM

Fast neural network regularization with Dropout and DropConnect

Distance-based human action recognition using optimized class representations

Evaluation of the different sleep-disordered breathing patterns of the compressed tracheal sound

X-ray microtomographic confirmation of the reliability of CBCT in identifying the scalar location of cochlear implant electrode after round window insertion

Association between soluble L-selectin and anti-JCV antibodies in natalizumab-treated relapsing-remitting MS patients

The effects of neuron morphology on graph theoretic measures of network connectivity  
The analysis of a two-level statistical model

Experiments of the sonification of the sleep electroencephalogram

Standardized evaluation of algorithms for computer-aided diagnosis of dementia based on structural MRI  
The CADDementia challenge

Podocyte apoptosis is prevented by blocking the Toll-like receptor pathway

Analysis of apoptosis-related genes in patients with clinically isolated syndrome and their association with conversion to multiple sclerosis

Extreme learning machine based supervised subspace learning

Patient-specific induced pluripotent stem cell—derived RPE cells  
Understanding the pathogenesis of retinopathy in long-chain 3-hydroxyacyl-CoA dehydrogenase deficiency

Effects of cytokine activation and oxidative stress on the function of the human embryonic stem cell—derived retinal pigment epithelial cells

Defining the anterior nucleus of the thalamus (ANT) as a deep brain stimulation target in refractory epilepsy  
Delineation using 3 T MRI and intraoperative microelectrode recording

Regularized extreme learning machine for multi-view semi-supervised action recognition

Autoimmunity-related immunological serum markers and survival in a tertiary care cohort of adult patients with epilepsy

Immediate effects of deep brain stimulation of anterior thalamic nuclei on executive functions and emotion-attention interaction in humans

Comparison of stapedotomy minus prosthesis, circumferential stapes mobilization, and small fenestra stapedotomy for stapes fixation

Origins and functional consequences of somatic mitochondrial DNA mutations in human cancer

Learning sparse representations for view-independent human action recognition based on fuzzy distances

Post-stroke depression and depression-executive dysfunction syndrome are associated with recurrence of ischaemic stroke

Effects of exogenous alpha-synuclein on stimulated dopamine overflow in dorsal striatum

Transfer learning using a nonparametric sparse topic model

Mismatch negativity abnormality in traumatic brain injury without macroscopic lesions on conventional MRI

Fluorescent probes as a tool for cell population tracking in spontaneously active neural networks derived from human pluripotent stem cells

Influence of the experimental design of gene expression studies on the inference of gene regulatory networks  
Environmental factors

Disconnection between periodic leg movements and cortical arousals in spinal cord injury

Mortality by clinical characteristics in a tertiary care cohort of adult patients with chronic epilepsy

Extensive white matter changes predict stroke recurrence up to 5 years after a first-ever ischemic stroke

Melatonin pathway genes are associated with progressive subtypes and disability status in multiple sclerosis among Finnish patients

Neuroprotective effect of RO-20-1724-a phosphodiesterase4 inhibitor against intracerebroventricular streptozotocin induced cognitive deficit and oxidative stress in rats

Inhibition of Casein kinase-2 induces p53-dependent cell cycle arrest and sensitizes glioblastoma cells to tumor necrosis factor (TNF $\alpha$ )-induced apoptosis through SIRT1 inhibition

Cortical spreading depression in alpha-synuclein knockout mice

The effect of different text presentation formats on eye movement metrics in reading

COX-2 regulates the proliferation of glioma stem like cells

Pathway analysis of expression data  
Deciphering functional building blocks of complex diseases

Disease-associated inflammatory biomarker profiles in blood in different subtypes of multiple sclerosis  
Prospective clinical and MRI follow-up study

Mesopic background lights enhance dark-adapted cone ERG flash responses in the intact mouse retina  
A possible role for gap junctional decoupling

Cost-effectiveness of decompressive craniectomy in non-traumatic neurological emergencies

Fault tolerant machine learning for nanoscale cognitive radio

Neuromuscular pathology in mice lacking alpha-synuclein

Influence of the neural network topology on the learning dynamics

A constrained HMM-based approach to the estimation of perceptual switching dynamics in pigeons

Erratum

Extracting the dynamics of perceptual switching from 'noisy' behaviour: An application of hidden Markov modelling to pecking data from pigeons (Journal of Physiology Paris (2000) 94:5-6 (555-567) PII: S0928425700010950)

Extracting the dynamics of perceptual switching from 'noisy' behaviour  
An application of hidden Markov modelling to pecking data from pigeons

Salivary cortisol reactivity to psychological stressors in infancy  
A meta-analysis

From in silico astrocyte cell models to neuron-astrocyte network models  
A review

Advances in Human Stem Cell-Derived Neuronal Cell Culturing and Analysis

Deep audio-visual saliency  
Baseline model and data

Human-robot interactive learning architecture using ontologies and symbol manipulation

Automatic objective thresholding to detect neuronal action potentials

Whole-cell morphological properties of neurons constrain the nonrandom features of network connectivity

Real-time hidden gaze point correction

TraQuMe

A tool for measuring the gaze tracking quality

Look and lean

Accurate head-assisted eye pointing

Haptic feedback to gaze events

On the effect of network structure and synaptic mechanisms on sustained bursting activity

In silico study on structure and dynamics in bursting neuronal networks

Significance of graph theoretic measures in predicting neuronal network activity

Gaze gestures or dwell-based interaction?

Comparison of eye movement filters used in HCI

Simple gaze gestures and the closure of the eyes as an interaction technique

The validity of using non-representative users in gaze communication research

Emergence of global and local structural features during development of neuronal networks

Effects of structure on spontaneous activity in simulated neuronal networks

Computational study of structural changes in neuronal networks during growth: a model of dissociated neocortical cultures

Julkaisun otsikon käännös: : Computational study of structural changes in neuronal networks during growth: a model of dissociated neocortical cultures

Computational modeling of growth in cortical cultures using the NETMORPH simulation tool

Julkaisun otsikon käännös: : Computational modeling of growth in cortical cultures using the NETMORPH simulation tool

Computational tools for assessing the properties of 2D neural cell cultures

Assessment of respiratory effort during sleep with noninvasive techniques

Effects of local structure of neuronal networks on spiking activity in silico

Data-driven study of synchronous population activity in generic spiking neuronal networks: How much do we capture using the minimal model for the considered phenomena?

Improvement of computational efficiency of a biochemical plasticity model

Data-driven study of synchronous population activity in generic spiking neuronal networks: How much do we capture using the minimal model for the considered phenomena?

Neural networks, cell cultures and some older work on data analysis.
