

Tailored gamification
A review of literature

The effect of challenge-based gamification on learning
An experiment in the context of statistics education

Kvazaar 2.0
Fast and efficient open-source HEVC inter encoder

Deep audio-visual saliency
Baseline model and data

A preliminary network analysis on steam game tags
Another way of understanding game genres

Color game
A collaborative social robotic game for icebreaking; Towards the design of robotic ambiances as part of smart building services

Demographic differences in accumulated types of capital in massively multiplayer online role-playing games

Innovation challenges as a novel multidisciplinary learning platform

Satisfaction and willingness to consume immersive journalism
Experiment of differences between VR, 360 video, and article

Social human-robot interaction in the wild
A workshop proposal for academic mindtrek 2020

"The superhero of the university"
Experience-driven design and field study of the university guidance robot

Avatar capital
The relationships between player orientation and their avatar's social, symbolic, economic and cultural capital

ClothFace
A Passive RFID-Based Human-Technology Interface on a Shirtsleeve

Development of measurement instrument for visual qualities of graphical user interface elements (VISQUAL)
a test in the context of mobile game icons

Does esports spectating influence game consumption?

From Chance to Serendipity
Knowledge Workers' Experiences of Serendipitous Social Encounters

Multi-sensor next-best-view planning as matroid-constrained submodular maximization

Probabilistic approach to physical object disentangling

User experience of stereo and spatial audio in 360° live music videos

Understanding decision-making in recruitment
Opportunities and challenges for information technology

Promoting local culture and enriching airport experiences through interactive storytelling

An icon that everyone wants to click
How perceived aesthetic qualities predict app icon successfulness

Red Alert
Break-Glass Protocol to Access Encrypted Medical Records in the Cloud

Game postmortems vs. developer Reddit AMAs
Computational analysis of developer communication

Social features in hybrid board game marketing material

Real-time online drilling vibration analysis using data mining

Understanding engagement in web-based Acceptance and Commitment Therapy interventions for parental burnout:
Usage, dose-response and user experiences

Public and open HEVC encoding service in the cloud

Facilitating the first move
Exploring inspirational design patterns for aiding initiation of social encounters

Diffusion of innovation
Case of co-design of cabins in mobile work machine industry

Additional lossless compression of JPEG images based on BPG

Combined no-reference IQA metric and its performance analysis

Phase masks optimization for broadband diffractive imaging

Thin form-factor super multiview head-up display system

Performance evaluation of bandwidth reservation for mmWave 5G NR systems

Characterization of the anisotropic deformation of the right ventricle during open heart surgery

DNA Molecular Storage System
Transferring Digitally Encoded Information through Bacterial Nanonetworks

Log analysis of 360-degree video users via MQTT

Mille-Oeille

An architectural response to zoos' obsolescence in post-anthropocentric times

Teaching semantics and skills for human-robot collaboration

Uses and Gratifications of Pokémon Go

Why do People Play Mobile Location-Based Augmented Reality Games?

Collaborative Writing and Knowledge Creation in a Social Media Online Community

Human-robot interactive learning architecture using ontologies and symbol manipulation

Guidelines for development and evaluation of usage data analytics tools for human-machine interactions with industrial manufacturing systems

Implications of audio and narration in the user experience design of virtual reality

Robotic process automation - Creating value by digitalizing work in the private healthcare?

Systematic literature review on user logging in virtual reality

The Finnish you – An interactive storytelling application for an airport environment

Olfactory display prototype for presenting and sensing authentic and synthetic odors

Analysis of accommodation cues in holographic stereograms

Viewing simulation of integral imaging display based on wave optics

Designing for experiences with socially interactive robots

Understanding animals

A critical challenge in ACI

Digital services and youth participation in processes of social change: World Café workshops in Finland

Liking the game

How can spectating motivations influence social media usage at live esports events?

Activation game for older adults - Development and initial user experiences

Code notes

Designing a low-cost tangible coding tool for/with children

Fast and easy live video service setup using lightweight virtualization

Optimized viewport dependent streaming of stereoscopic omnidirectional video

Investigating the effects of legacy bias
User elicited gestures from the end users perspective

Looking for a five-legged sheep
Identifying enterprise architects' skills and competencies

Preface
Special Issue on 'New Hydraulic Components for Tough Robots'

Ripple thermostat
Affecting the emotional experience through interactive force feedback and shape change

A novel technique for analysis of postural information with wearable devices

Investigating relationships between video gaming, spectating esports, and gambling

Social motivations of live-streaming viewer engagement on Twitch

The use of advanced imaging technology in welfare technology solutions - Some ethical aspects

Viewport-dependent delivery schemes for stereoscopic panoramic video

Blind estimation of white Gaussian noise variance in highly textured images

Combined local and global image enhancement algorithm

Compression of signs of DCT coefficients for additional lossless compression of JPEG images

Conversion of sparsely-captured light field into alias-free fullparallax multiview content

Deep p-Fibonacci scattering networks

Designing interactive systems for work engagement

Gamification, quantified-self or social networking? Matching users' goals with motivational technology

Methods and tools for denoising of complex-valued images based on block-matching and high order singular value decomposition

Mille-Oeille
Environmental Zoo

Robust linearized combined metrics of image visual quality

Special Issue on Designing Interactive Systems for Work Engagement

How games induce cooperation? A study on the relationship between game features and we-intentions in an augmented reality game

Multi-factor authentication for wearables
Configuring system parameters with risk function

Bandwidth reduction of omnidirectional viewport-dependent video streaming via subjective quality assessment

Gamified crowdsourcing
Conceptualization, literature review, and future agenda

Content structure is king
An empirical study on gratifications, game genres and content type on Twitch

Mobility aware eMBMS management in urban 5G-oriented systems

Novel D2D-based relaying method for multicast services over 3GPP LTE-A systems

Optimal subgroup configuration for multicast services over 5G-satellite systems

Children designing videos
Tools, pedagogical models, and best practices for digital storytelling and media-making in the classroom

Barriers for bridging interpersonal gaps
Three inspirational design patterns for increasing collocated social interaction

Comparing communication effort within the scrum, scrum with Kanban, XP, and Banana development processes

Operationalizing the experience factory for effort estimation in agile processes

Do badges increase user activity? A field experiment on the effects of gamification

Why do people buy virtual goods
A meta-analysis

Microservices in agile software development
A workshop-based study into issues, advantages, and disadvantages

Effects of extrinsic noise are promoter kinetics dependent

Assessing fraction knowledge by a digital game

Modular audio story platform for museums

Towards a conceptual framework for privacy protection in the use of interactive 360° video surveillance

BM3D-HVS
Content-Adaptive denoising for improved visual quality

From theories to game mechanics
Developing a game for training rational numbers

Full-reference metrics multidistortional analysis

The nexus between social media behaviour, negative consumer emotions and brand disloyalty

Can e-government solutions enhance the work in municipalities?: empirical evidence from case lupapiste

Casual immersive viewing with smartphones

Focusing on user experience and business models in startups
Investigation of two-dimensional value creation

Participatory development of user experience design guidelines for a B2B company

Software visualization today - Systematic literature review

Temporal dimensions of affect in user experience of digital news in the field

The 5C categorization of social media tools

Challenges and capabilities of conductive polymeric materials for electromechanical stimulation of stem cells
A case study

Using elicitation studies to generate collocated interaction methods

Decoding complexity reduction in projection-based light-field 3D displays using self-contained HEVC tiles

Sparse modelling and predictive coding of subaperture images for lossless plenoptic image compression

An evaluation framework for cross-platform mobile app development tools
A case analysis of adobe PhoneGap framework

A survey on aims and environments of diversification and obfuscation in software security

Emotional Reactions to Point-Light Display Animations

Exploring the use of deprecated PHP releases in the wild internet
Still a LAMP issue?

Exploring the role of ten universal values in using products and services

Feasibility characterization of cryptographic primitives for constrained (wearable) IoT devices

Learnings from the Finnish game industry

Patterns for safety system bus architecture

Patterns for subsidiaries as innovation tools

Increasing collocated people's awareness of the mobile user's activities
A field trial of social displays

Social display...We can see what you are doing on your mobile device

Graph Embedded Extreme Learning Machine

Need to touch, wonder of discovery, and social capital
Experiences with interactive playful seats

Who is moving - User or device? Experienced quality of mobile 3D video in vehicles

Defining user experience goals to guide the design of industrial systems

Exploring co-learning behavior of conference participants with visual network analysis of Twitter data

Antroposeeni - A mixed reality game

OASIS deck of cards - House of colleagues
A playful

"Working out for likes"
An empirical study on social influence in exercise gamification

Mobiscool
1st workshop on mobile, social and culturally oriented learning

Delivering directional haptic cues through eyeglasses and a seat

Sequential and simultaneous tactile stimulation with multiple actuators on head, neck and back for gaze cuing

Understanding the most influential user experiences in successful and unsuccessful technology adoptions

Four patterns for internal startups

Three patterns for user involvement in startups

Railway fastener inspection by real-time machine vision

A comparison of security assurance support of agile software development methods

Glance awareness and gaze interaction in smartwatches

Intentstreams

Smart parallel search streams for branching exploratory search

Adaptive spatial resolution selection for stereoscopic video compression with MV-HEVC

A frequency based approach

Salient event detection in basketball mobile videos

Stereoscopic video description for human action recognition

A Barrier framework for open e-learning in public administrations

Benefits for supplier and customer with the help of logged usage data

Characterizing Context of Use in Mobile Work

Design principles for collaboration platforms for open education

Dynamic text presentation in print interpreting - An eye movement study of reading behaviour

Getting started with the experience design process

Increasing user and customer understanding through rapid ethnography in emerging markets

Perceived Impacts as User Experience Components in Mobile News Making with Smartphones

Quality measures for improving technology trees

Supplier's Expectations on Usage Data Analytics of Complex Industrial Systems

The Fuzzy Front End of Experience Design: Eliciting and Communicating Experience Goals

User Experience of Digital News

Two Semi-long Term Field Studies

UX sensors - Understanding the UX of complex systems through usage analysis

Vibrotactile Stimulation as an Instructor for Mimicry-Based Physical Exercise

Class-Specific Reference Discriminant Analysis With Application in Human Behavior Analysis

Schoolchildren's user experiences on a physical exercise game utilizing lighting and audio

Embroidered ground plane implementation for wearable UHF RFID patch tag antennas

Goofy Mus, grumpy Mur and dirty Muf
Talking playful seats with personalities

Information wall
Evaluation of a gesture-controlled public display

Body-touching
An embodied interaction technique for health information systems in developing regions

DYNAMO sound engine - Exploring the aesthetics of dynamic sound interactions

Email intensity, productivity and control in the knowledge worker's performance on the desktop

Games and energy
Profiling power usage during play

MurMur Moderators, the talking playful seats

Effects of directional haptic and non-speech audio cues in a cognitively demanding navigation task

Effects of haptic feedback on gaze based auto scrolling

Gaze-contingent scrolling and reading patterns

Human-technology choreographies
Re-thinking body, movement and space in interaction design

Seniors and text messaging on mobile touchscreen phones

The fuzzy front end of experience design

Using gaze gestures with haptic feedback on glasses

Tut MUVIS image retrieval system proposal for MSR-Bing challenge 2014
Julkaisun otsikon käännös: : TUT Muvis Image Retrieval System Proposal for MSR-BING Challenge 2014

Patterns for controlling chaos in a startup

Two patterns for minimizing human resources in a startup

Global social knowledge management - Understanding barriers for global workers utilizing social software

Bars, pies, doughnuts & tables - Visualization of proportions

Browsing patterns in retrieved documents

Controlled experiments comparing fault-tree-based safety analysis techniques

Demographic differences in perceived benefits from gamification

Gaze gestures and haptic feedback in mobile devices

Glasses with haptic feedback of gaze gestures

Haptic feedback to gaze events

Head movement and facial expressions as game input

IntentRadar

Search user interface that anticipates user's search intents

Layers of user expectations of future technologies

An early framework

Look and lean

Accurate head-assisted eye pointing

Measuring flow in gamification

Dispositional Flow Scale-2

Opportunities and Challenges of Mobile Applications as "Tickets-to-Talk": A Scenario-Based User Study

Julkaisun otsikon käännös: : Opportunities and Challenges of Mobile Applications as "Tickets-to-Talk": A Scenario-Based User Study

Preferences for touch gestures in audio-tactile communication

Real-time hidden gaze point correction

The usability of text entry systems now and in the future

Transparency of intentions decreases privacy concerns in ubiquitous surveillance

TraQuMe

A tool for measuring the gaze tracking quality

Comparison of Saltation, Amplitude Modulation, and a Hybrid Method of Vibrotactile Stimulation

An evaluation of the virtual curvature with the StickGrip haptic device

A case study

Subjective responses to synthesised speech with lexical emotional content

The effect of the naturalness of the synthetic voice

'Aie-studio' - A pragmatist aesthetic approach for procedural sound design

Evaluating landmark attraction model in collaborative wayfinding in virtual learning environments

Evaluating the experiential user experience of public display applications in the wild

Front-camera video recordings as emotion responses to mobile photos shared within close-knit groups

Gestures and widgets

Performance in text editing on multi-touch capable mobile devices

How to study programming on mobile touch devices - Interactive Python code exercises

Integration of BIM and automation in high-rise building construction

Mixed reality with multimodal head-mounted pico projector

Mobile dictation for healthcare professionals

Multiplicative update for fast optimization of information retrieval based neighbor embedding

Reading on-screen text with gaze-based auto-scrolling

Recording and analyzing in-browser programming sessions

Scalable optimization of neighbor embedding for visualization

Seek'N'Share

A platform for location-based collaborative mobile learning

SiMPE

8th workshop on speech and sound in mobile and pervasive environments

The innovations in learning and education SAVI

Touch gestures in communicating emotional intention via vibrotactile stimulation

Virtual sectioning and haptic exploration of volumetric shapes in the absence of visual feedback

Virtual stick in caret positioning on touch screens

WeSlide

Gestural text entry for elderly users of interactive television

SymbolChat

A flexible picture-based communication platform for users with intellectual disabilities

Barriers to task-based information access in molecular medicine

An exploratory study of eye typing fundamentals
Dwell time, text entry rate, errors, and workload

Briefing news reporting with mobile assignments - Perceptions, needs and challenges

Comparison of eye movement filters used in HCI

Comparison of video-based pointing and selection techniques for hands-free text entry

Continuous Edgewise
Dictionary-based disambiguation instead of explicit segmentation by the user

Designing and evaluating text entry methods

Efficient optimization for data visualization as an information retrieval task

Gaze gestures or dwell-based interaction?

Haptic visualization of bathymetric data

Heart rate responses to synthesized affective spoken words

Location-based crowdsourcing of hyperlocal news - Dimensions of participation preferences
Julkaisun otsikon käännös: : Location-Based Crowdsourcing of Hyperlocal News - Dimensions of Participation Preferences

Model for landmark highlighting in mobile web services

Novel approaches to crawling important pages early

SiMPE
7th Workshop on speech and sound in mobile and pervasive environments

Simple gaze gestures and the closure of the eyes as an interaction technique

Tactile modulation of emotional speech samples

The validity of using non-representative users in gaze communication research

Towards usability heuristics for games utilizing speech recognition

Integrating discrete events and continuous head movements for video-based interaction techniques

Interaction strategies for an affective conversational agent

At least nine ways to play
Approaching gamer mentalities

Multimodal and mobile conversational Health and Fitness Companions

Some background on dialogue management and conversational speech for dialogue systems

Comparison of gaze-to-objects mapping algorithms

Designing tactile feedback for piezo buttons

Facial expression classification based on local spatiotemporal edge and texture descriptors

Framework for designing and evaluating game achievements

Interpretation of ambiguous images inspected by the StickGrip device

Multimodal multi-device program guide for smart conferences

Narrative friction in Alternate Reality Games
Design insights from conspiracy for good

Of discs, boxes and cartridges
The material life of digital games

On the costs of multiple trajectory pointing methods

Presenting spatial tactile messages with a hand-held device

Reducing the number of unit tests with design by contract

SiMPE
6th Workshop on Speech in Mobile and Pervasive Environments

Social and privacy aspects of a system for collaborative public expression

Squeeze vs. tilt
A comparative study using continuous tactile feedback

The making of Nordic larp
Documenting a tradition of ephemeral co-creative play

We need to talk
Rediscovering audio for universal access (A panel)

Explicit dynamics formulation of Stewart-Gough platform
A Newton-Euler approach

Forward kinematic analysis of a planar cable driven redundant parallel manipulator using force sensors

Information interaction in molecular medicine
Integrated use of multiple channels

Neural networks, cell cultures and some older work on data analysis.

Mobile Journalist Toolkit
A field study on producing news articles with a mobile device

The SenseCam as a tool for task observation

HCI and homecare
Connecting families and clinicians
