

Factors affecting the organizational readiness to design autonomous machine systems
Towards an evaluation framework

Simultaneous Identification of Multiple Control Loops in DC Microgrid Power Converters

Necessary and sufficient conditions for the existence of solution of generalized fuzzy relation equations $A \Leftrightarrow X = B$

Soft robotic gripper with compliant cell stacks for industrial part handling

Model predictive control for regular linear systems

Flow-bounded trajectory-scaling algorithm for hydraulic robotic manipulators

On the zeros of the partial Hosoya polynomial of graphs

Transparent microelectrode arrays fabricated by ion beam assisted deposition for neuronal cell in vitro recordings

Effect of energy recovery on efficiency in electro-hydrostatic closed system for differential actuator

Gaussian mixture models for signal mapping and positioning

Circular dichroism in the second harmonic field evidenced by asymmetric Au coated GaAs nanowires

Asymptotics and approximation of large systems of ordinary differential equations

Charlie and the CryptoFactory
Towards Secure and Trusted Manufacturing Environments

Comparative energy analysis of a load sensing system and a zonal hydraulics for a 9-tonne excavator

Ethical considerations on using learning analytics in Finnish higher education

Expectation differences between students and staff of using learning analytics in Finnish universities

FinnForest dataset
A forest landscape for visual SLAM

Introducing Multi-Convexity in Path Constrained Trajectory Optimization for Mobile Manipulators

Multi-sensor next-best-view planning as matroid-constrained submodular maximization

Probabilistic approach to physical object disentangling

Quantifying the pore structure of different biochars and their impacts on the water retention properties of Sphagnum moss growing media

Redundancy-based visual tool center point pose estimation for long-reach manipulators

Resilient Cooperative Voltage Control for Distribution Network with High Penetration Distributed Energy Resources

Using AI to Decrease Demand and Supply Mismatch in ITC Labour Market

Vehicle Attribute Recognition by Appearance
Computer Vision Methods for Vehicle Type, Make and Model Classification

Geometry-Based V2V Channel Modeling over Millimeter-Wave in Highway Scenarios

Implementation of 3GPP LTE Cat-M1 Technology in NS-3
System Simulation and Performance

Multi-Radio Perspectives for Massive MTC Localization
Energy Consumption and Utility

On Load-Aware Cell Association Schemes for Group User Mobility in mmWave Networks

An approval of MPPT based on pv cell's simplified equivalent circuit during fast-shading conditions

Efficient 3D visual perception for robotic rock breaking

Hermitian normalized Laplacian matrix for directed networks

Depth estimation with ego-motion assisted monocular camera

Approximate Controllability for Navier–Stokes Equations in 3D Rectangles Under Lions Boundary Conditions

Architecture for Safe Human-Robot Collaboration
Multi-Modal Communication in Virtual Reality for Efficient Task Execution

Robust output regulation of counter-flow heat exchangers

The internal model principle for boundary control systems with polynomially bounded exogenous signals

Approximate robust output regulation of boundary control systems

Improving tracking performance of composite nonlinear feedback controllers via new reset and hold feature of nonlinear functions

Robust and perfect tracking control of a DC servo motor

Mass balance control of crushing circuits

Energy-efficient and high-precision control of hydraulic robots

Double Shadowing the Rician Fading Model

Nonlinear model predictive energy management of hydrostatic drive transmissions

Improving Session Continuity with Bandwidth Reservation in mmWave Communications

Data Vault Mappings to Dimensional Model Using Schema Matching

Performance evaluation of bandwidth reservation for mmWave 5G NR systems

Towards detecting structural branching and cyclicity in graphs
A polynomial-based approach

ALMARVI System Solution for Image and Video Processing in Healthcare, Surveillance and Mobile Applications

Characteristics of a circular economy framework to support strategic renewal in manufacturing firms

Client-Side Cornucopia
Comparing the Built-In Application Architecture Models in the Web Browser

Comfort Design in Human Robot Cooperative Tasks

Correlations between holistic awareness of time and innovativeness

Digitalization Changing Work
Employees' View on the Benefits and Hindrances

Digital Predistortion for 5G Small Cell
GPU Implementation and RF Measurements

Experimental analysis on the turning of aluminum alloy 7075 based on Taguchi method and artificial neural network

Hardware-in-the-loop platform for testing autonomous vehicle control algorithms

How workplaces actually carry out OSH-related risk assessment and management

Investigation on positioning control strategy and switching optimization of an equal coded digital valve system

LeanGame, a digital training tool to implement lean philosophy

On the Distribution of the Stationary Point of Significance Level for Empirical Distribution Function

Organizational development-lean thinking through the LeanGame learning game

Spodumene tailings for porcelain and structural materials
Effect of temperature (1050–1200°C) on the sintering and properties

Task balancing between human and robot in mid-heavy assembly tasks

Variable speed digital hydraulic transformer-based servo drive

Active scanner control on paper machines

On the Sum of Fisher-Snedecor F Variates and its Application to Maximal-Ratio Combining

Toward Efficient Execution of RVC-CAL Dataflow Programs on Multicore Platforms

Graph measures with high discrimination power revisited
A random polynomial approach

A distributed automation architecture for distribution networks, from design to implementation

Lessons learnt from real-time monitoring of the low voltage distribution network

Multi-source localization using a DOA Kernel based spatial covariance model and complex nonnegative matrix factorization

Complete Odometry Estimation of a Vehicle Using Single Automotive Radar and a Gyroscope

Dimensional analysis conceptual modeling supporting adaptable reasoning in simulation-based training

Efficient method for the real-time contingency analysis of meshed HVDC power grids fed by VSC stations

Stabilization to trajectories for parabolic equations

Preface
Special Issue on 'New Hydraulic Components for Tough Robots'

Backshoring of production in the context of a small and open Nordic economy

An approach to combining related notifications in large-scale building management systems with a rehabilitation facility case study

Prioritizing corrective maintenance activities for android applications
An industrial case study on android crash reports

Addressing closed-chain dynamics for high-precision control of hydraulic cylinder actuated manipulators

A neural network strategy for learning of nonlinearities toward feed-forward control of pressure-compensated hydraulic valves with a significant dead zone

A Simple Robust Controller for Port-Hamiltonian Systems

Asynchronous communication platform concept to coordinate large-scale industrial processes

A variable switching point predictive current control strategy for quasi-Z-source inverters

Avoiding wow-gaps through wow-canvas in business development

Bilateral teleoperation of a hydraulic robotic manipulator in contact with physical and virtual constraints

Direct position control of electro-hydraulic excavator

Effect of driver and work cycle on losses of a loader

Energy System Planning towards Renewable Power System
Energy Matrix Change in Cuba by 2030

Finding the wow-factor to enhance business

Floating frame of reference formulation for a flexible manipulator with hydraulic actuation - Modelling and experimental validation

Generator Platform of Benchmark Time-Lapsed Images Development of Cell Tracking Algorithms
Implementation of New Features Towards a Realistic Simulation of the Cell Spatial and Temporal Organization

Management style, focus and purpose in development of lean in university hospital

Mixed-integer linear programming approach for global discrete sizing optimization of frame structures

Model-based control of a digital hydraulic transformer-based hybrid actuator

Model-Based Dynamic Scheduling for Multicore Signal Processing

On the basis of the sales engineering competences and education

On the degeneracy of the Randić entropy and related graph measures

PHIL Test Bench for Online-Identification Methods of Complex Power Grid

Reduced Order Internal Models in the Frequency Domain

Robust Regulation of Infinite-Dimensional Port-Hamiltonian Systems

System-level analysis of IEEE 802.11ah technology for unsaturated MTC traffic

Utilizing the innovation potential of suppliers in construction projects

基于相位旋转的SCMA码本优化方法

A Reduced-Order Two-Degree-of-Freedom Composite Nonlinear Feedback Control for a Rotary DC Servo Motor

Quantitative Graph Theory

A new branch of graph theory and network science

Sparse approximations in complex domain based on BM3D modeling

Adaptive and nonlinear control of discharge pressure for variable displacement axial piston pumps

Highly unique network descriptors based on the roots of the permanental polynomial

Multiuser detection scheme for SCMA with partial extrinsic information transmission

A generic method to optimize a redundant serial robotic manipulator's structure

Robust Output Regulation for Continuous-Time Periodic Systems

Real-time hardware- and software-in-the-loop simulation of decentralised distribution network control architecture

Feed-hopper level estimation and control in cone crushers

Indirect NO_x emission monitoring in natural gas fired boilers

Multi-robot active information gathering with periodic communication

Robustifying correspondence based 6D object pose estimation

Order reduction for a signaling pathway model of neuronal synaptic plasticity

Robust Regulation of MIMO systems

A Reformulation of the Internal Model Principle

Utilization of Drum Boilers' Storage Capacity for Flexible Operation

Mobile devices and professional equipment synergies for sport video summary production

Guest Editorial

Implementation Issues in System-on-Chip

Power Mitigation by Performance Equalization in a Heterogeneous Reconfigurable Multicore Architecture

A fractional representation approach to the robust regulation problem for SISO systems

Asymptotic behaviour in the robot rendezvous problem

Output Regulation of Infinite-Dimensional Time-Delay Systems

A survey on control of hydraulic robotic manipulators with projection to future trends

Guest editorial introduction to the focused section on design and control of hydraulic robots

Determining maximum MPP-tracking sampling frequency for input-voltage-controlled PV-interfacing converter

A Hybrid Task Graph Scheduler for High Performance Image Processing Workflows

Comparing requirements decomposition within the Scrum, Scrum with Kanban, XP, and Banana development processes

Data Flow Algorithms for Processors with Vector Extensions
Handling Actors With Internal State

Data Rate Assessment on L2–L3 CPU Bus and Bus between CPU and RAM in Modern CPUs

Design Flow for GPU and Multicore Execution of Dynamic Dataflow Programs

Eeny, Meeny, Miny, Mo...

A multiple case study on selecting a technique for user-interaction data collecting

Encapsulation Of MES Functionalities As RESTful Web Services For Knowledge-Driven Manufacturing Systems

From theories to game mechanics

Developing a game for training rational numbers

Implementation of a Multirate Resampler for Multi-carrier Systems on GPUs
